ORDER, COMPLAINT, OR
NON # _____
(CIRCLE ONE)

FROM # 0300297

OWNER/OPERATOR Charlotte Cantley / Cantley's Exxon

1. Regulation requires that cathodic protection system be tested at least once every three years. Have system tested/ repaired by a Class "D" certified individual sending test and repair results to this inspector

2. Regulation requires that monthly leak detection be performed on all tanks! Inventory Control + Tank Tightness Testing can only be used for ten years after tank installation or upgrade. (Expiration for your tanks 1995)
- Need to adopt another approved method such as SIR, Groundwater monitoring, ATG.

- There are four groundwater monitoring wells at your facility; If water always within 20 feet from surface you can use this method
- Keep a log a monthly checking for product vapors within water

1. FACILITY INFORMATION	
Owner: <u>Charlotte Cantley</u>	Operator: <u>Same</u>
Address: <u>P.O. Box 62</u>	Address: _____
City: <u>Racine</u> State: <u>W.V.</u> Zip: <u>25165</u>	City: _____ State: _____ Zip: _____
Phone: (<u>304</u>) <u>837-3900</u>	Phone: () _____
LOCATION OF TANKS:	
Facility Name: <u>Cantley's Exxon</u>	City: <u>Racine</u>
Street Address: _____	County: <u>Boone</u> Phone: () _____

Information received from an inspection conducted on or about the 27 day of March, 2003, on the above facility has revealed that you are the owner and/or operator of the underground storage tank systems and you are in violation of the provisions of Chapter 22, Article 17, Section 6 of the Code of West Virginia and/or Section(s) 42CR 280.41 (a) of the Rules and Regulations in that you Failed to monitor underground storage tanks at least every 30 days for releases using one of the approved methods listed in 280.43(d) through (h).

Therefore, pursuant to the authority contained in Chapter 22, Article 17, of the Code of West Virginia, you are hereby notified that you are in NON-COMPLIANCE of the provisions of the Code of West Virginia as described above. You should accomplish the following remedial measures on or before the 27 day of April, 2003:

Adopt an approved monthly monitoring method for all tanks with over 1" of material within them. Send first month of leak detection results to this inspector. Could use groundwater monitoring

NOTICE

The Director may issue an Administrative Order and/or may commence a Civil Action in the Circuit Court, including a temporary or permanent injunction in accordance with West Virginia Code, Chapter 22-17-15 and you may be liable for a civil penalty in accordance with Chapter 22-17-16.

Owner: <u>Cantley's</u>	Phone: <u>(304) 557-5700</u>
Operator: <u>Same</u>	Phone: _____

TO THE OWNER AND OPERATOR:

WHEREAS, AN INSPECTION MADE ON OR ABOUT THE 26 DAY OF April, 19 2004, ON YOUR UNDERGROUND STORAGE TANK FACILITY AT THE ABOVE LOCATION REVEALED THAT A RELEASE OF A REGULATED SUBSTANCE MAY HAVE OCCURRED BASED ON THE FOLLOWING:

(Mark all that apply [])

- 1. The discovery of released regulated substance at the UST site or in the surrounding area. Explain: _____
- 2. Unusual operating conditions of UST system equipment that may indicate a release of regulated substance. Explain: _____
- 3. Monitoring results of the release detection system indicate a release may have occurred. Explain: SIR "Fail" on premium tank

THEREFORE, PURSUANT TO THE AUTHORITY CONTAINED IN CHAPTER 20, ARTICLE 5H, OF THE CODE OF WEST VIRGINIA, YOU ARE HEREBY REQUESTED TO IMMEDIATELY INVESTIGATE AND CONFIRM THE RELEASE AT YOUR FACILITY USING THE FOLLOWING PROCEDURES AND REPORT THE RESULTS WITHIN 7 DAYS.

(Mark all that apply [])

- A. System test: Conduct a tank tightness test to determine if a leak exists in that portion of the tank that routinely contains product, including the attached piping.
- B. Site check: Conduct an initial site check in the area surrounding the UST system where contamination is most likely to be present.

IF A RELEASE IS CONFIRMED YOU MUST TAKE THE FOLLOWING INITIAL RESPONSE ACTIONS WITHIN 24 HOURS:

- 1. Report the release by telephone [(304) 558-6371] and follow-up the report with written correspondence to the Office of Waste Management, Underground Storage Tank Section.
- 2. Take immediate action to prevent any further release.
- 3. Identify and mitigate fire, explosion, and vapor hazards both on and off site.

WARNING

If you are the owner and/or operator and you fail to accomplish the above-described measures within the time specified, the Director may issue an Administrative Order and/or may commence a Civil Action in the Circuit Court, including a temporary or permanent injunction in accordance with West Virginia Code, Chapter 20-5H-15 and you may be liable for a civil penalty in accordance with Chapter 20-5H-16.

Notification for Underground Storage Tanks

W. Va. Department of Environmental Protection
Division of Water & Waste Management - UST
601 57th St.
Charleston, WV 25304

STATE USE ONLY

ID NUMBER: 0-300297

DATE RECEIVED: 6-3-05

DATE ENTERED INTO COMPUTER: 6/3/05

DATA ENTRY CLERK INITIALS: ML

OWNER WAS CONTACTED TO CLARIFY RESPONSES, COMMENTS

TYPE OF NOTIFICATION

<input type="checkbox"/> A. NEW FACILITY	<input checked="" type="checkbox"/> B. AMENDED <u>June</u>	<input type="checkbox"/> C. CLOSURE
Number of tanks at facility	Number of continuation sheets attached	

INSTRUCTIONS AND GENERAL INFORMATION

Please type or print in ink. Also, be sure you have signatures in ink for sections VIII and XI. Complete a notification form for each location containing underground storage tanks. If more than 5 tanks are owned at this location, you may photocopy pages 3 through 5 and use them for additional tanks.

The primary purpose of this notification program is to locate and evaluate underground storage tank systems (USTs) that store or have stored petroleum or hazardous substances. The information you provide will be based on reasonably available records, or in the absence of such records, your knowledge or recollection.

State law requires UST owners to use this notification form for all USTs storing regulated substances that are brought into use after May 1, 1990, (May 8, 1986, by Federal law) or USTs in the ground as of May 1, 1990, (May 8, 1986 by Federal law) that have stored regulated substances at any time. The information requested is required by the West Virginia Underground Storage Tank Act, Chapter 22 Article 17.

Who Must Notify? The UST Act requires owners of USTs that store regulated substances (unless exempted) to notify the Department of Environmental Protection of the existence of their USTs. "Owner" is defined as:

- In the case of an UST in use on November 8, 1984, or brought into use after that date, any person who owns an UST used for storage, use, or dispensing of regulated substances; or
- In the case of an UST in use before November 8, 1984, but no longer in use on that date, any person who owned the UST immediately before the discontinuation of its use.

Also any facility that has made any changes to facility information or UST system status, must submit a notification form.

What USTs Are Included? An UST system is defined as any one or combination of tanks that (1) is used to contain an accumulation of regulated substances, and (2) whose volume (including connected underground piping) is 10% or more beneath the ground. Regulated USTs store petroleum or hazardous substances (see the following "What Substances Are Covered").

What Tanks Are Excluded From Notification?

- Tanks removed from the ground on or before May 8, 1986;
- Farm or residential tanks of 1,100 gallons or less capacity storing motor fuel for noncommercial purposes;
- Tanks storing heating oil for use on the premises where stored;
- Septic tanks;
- Pipeline facilities (including gathering lines) regulated under the Natural Gas Pipeline Safety Act of 1968, or the Hazardous Liquid Pipeline Safety Act of 1979, or which is an intrastate pipeline facility regulated under State laws;
- Surface impoundments, pits, ponds, or lagoons;
- Storm water or waste water collection systems;
- Flow-through process tanks;
- Liquid traps or associated gathering lines directly related to oil or gas production and gathering operations;
- Tanks on or above the floor of underground areas, such as basements or tunnels;
- Tanks with a capacity of 110 gallons or less.

What Substances Are Covered? The notification requirements apply to USTs containing petroleum or certain hazardous substances. Petroleum includes gasoline, used oil, diesel fuel, crude oil or any fraction thereof which is liquid at standard conditions of temperature and pressure (60 degrees Fahrenheit and 14.7 pounds per square inch absolute). Hazardous substances are those found in Section 101 (14) of the Comprehensive Environmental Response, Compensation and Liability Act of 1980 (CERCLA), with the exception of those substances regulated as hazardous waste under Subtitle C of RCRA.

Where To Notify? Send completed forms to:

W. Va. Department of Environmental Protection
Division of Water & Waste Management - UST
601 57th St.
Charleston, WV 25304

When To Notify? 1. Owners of USTs in use or that have been taken out of operation, but still in the ground must notify by May 1, 1990, (May 8, 1986, by Federal law). 2. Owners who bring USTs into use after May 1, 1990, (May 8, 1986, by Federal law) must notify within 30 days of bringing the UST into use. 3. Notification of any amendments to facility must be filed by December 31 of that year. 4. New owners.

Penalties: Any owner who knowingly fails to register or submits false information shall be subject to a civil penalty not to exceed \$10,000 for each tank that is not registered or for which false information is submitted.

INSTRUCTIONS			
Please type or print in ink all items except "signature" in section VIII. This form must be completed for each location containing underground storage tanks. If more than five (5) tanks are owned at this location, photocopy the following sheets, and staple continuation sheets to the form.			

GENERAL INFORMATION

Notification is required by Federal law for all underground tanks that have been used to store regulated substances that are in the ground as of May 8, 1986, or that are brought into use after May 8, 1986. The information requested is required by Section 9002 of the Resource Conservation and Recovery Act, (RCRA), as amended.

The primary purpose of this notification program is to locate and evaluate underground tanks that store or have stored petroleum or hazardous substances. It is expected that the information you provide will be based on reasonably available records, or in the absence of such records, your knowledge, belief, or recollection.

Who Must Notify? Section 9002 of RCRA, as amended, requires that, unless exempted, owners of underground tanks that store regulated substances must notify designated State or local agencies of the existence of their tanks. Owner means—

- a) in the case of an underground storage tank in use on November 8, 1984, or brought into use after that date, any person who owns an underground storage tank used for the storage, use, or dispensing of regulated substances, and
- b) in the case of any underground storage tank in use before November 8, 1984, but no longer in use on that date, any person who owned such tank immediately before the discontinuation of its use.

c) if the State agency so requires, any facility that has undergone any changes to facility information or tank system status (only amended tank information needs to be included).

What Tanks Are Included? Underground storage tank is defined as any one or combination of tanks that (1) is used to contain an accumulation of "regulated substances," and (2) whose volume (including connected underground piping) is 10% or more beneath the ground. Some examples are underground tanks storing: 1. Gasoline, used oil, or diesel fuel, and 2. industrial solvents, pesticides, herbicides or fumigants.

What Tanks Are Excluded? Tanks removed from the ground are not subject to notification. Other tanks excluded from notification are:

- 1. farm or residential tanks of 1,100 gallons or less capacity used for storing motor fuel for noncommercial purposes;
- 2. tanks used for storing heating oil for consumptive use on the premises where stored;

- 3. septic tanks;
- 4. pipeline facilities (including gathering lines) regulated under the Natural Gas Pipeline Safety Act of 1968, or the Hazardous Liquid Pipeline Safety Act of 1979, or which is an intrastate pipeline facility regulated under State laws;
- 5. surface impoundments, pits, ponds, or lagoons;
- 6. storm water or waste water collection systems;
- 7. flow-through process tanks;
- 8. liquid traps or associated gathering lines directly related to oil or gas production and gathering operations;
- 9. storage tanks situated in an underground area (such as a basement, cellar, mine-working, drift, shaft, or tunnel) if the storage tank is situated upon or above the surface of the floor.

What Substances Are Covered? The notification requirements apply to underground storage tanks that contain regulated substances. This includes any substance defined as hazardous in section 101 (14) of the Comprehensive Environmental Response, Compensation and Liability Act of 1980 (CERCLA), with the exception of those substances regulated as hazardous waste under Subtitle C of RCRA. It also includes petroleum, e.g., crude oil or any fraction thereof, and liquid at standard conditions of temperature and pressure, and having a flash point below 140°F and 14.7 pounds per square inch absolute.

Where To Notify? Send completed forms to:

WV Division of Environmental Protection
Office of Waste Management
UST Section
1356 Hanford Street
Charleston, WV 25301

When To Notify? 1. Owners of underground tanks that have been taken out of operation by May 8, 1986. 2. Owners who bring underground storage tanks into use after May 8, 1986, must notify within 30 days of bringing the tanks into use. 3. If the State requires notification of any amendments to facility and information to State agency immediately.

Penalties: Any owner who knowingly fails to notify or submits false information shall be subject to a civil penalty not to exceed \$10,000 for each tank for which notification is not given or for which false information is submitted.

GENERAL INFORMATION

Notification is required by Federal law for all underground tanks that have been used to store regulated substances since January 1, 1974, that are in the ground as of May 8, 1986, or that are brought into use after May 8, 1986. The information requested is required by Section 9002 of the Resource Conservation and Recovery Act, (RCRA), as amended.

The primary purpose of this notification program is to locate and evaluate underground tanks that store or have stored petroleum or hazardous substances. It is expected that the information you provide will be based on reasonably available records, or, in the absence of such records, your knowledge, belief, or recollection.

Who Must Notify? Section 9002 of RCRA, as amended, requires that, unless exempted, owners of underground tanks that store regulated substances must notify designated State or local agencies of the existence of their tanks. Owner means—

(a) in the case of an underground storage tank in use on November 8, 1984, or brought into use after that date, any person who owns an underground storage tank used for the storage, use, or dispensing of regulated substances, and

(b) in the case of any underground storage tank in use before November 8, 1984, but no longer in use on that date, any person who owned such tank immediately before the discontinuation of its use.

What Tanks Are Included? Underground storage tank is defined as any one or combination of tanks that (1) is used to contain an accumulation of "regulated substances," and (2) whose volume (including connected underground piping) is 10% or more beneath the ground. Some examples are underground tanks storing: 1. gasoline, used oil, or diesel fuel, and 2. industrial solvents, pesticides, herbicides or fumigants.

What Tanks Are Excluded? Tanks removed from the ground are not subject to notification. Other tanks excluded from notification are:

1. farm or residential tanks of 1,100 gallons or less capacity used for storing motor fuel for noncommercial purposes;
2. tanks used for storing heating oil for consumptive use on the premises where stored;
3. septic tanks;

4. pipeline facilities (including gathering lines) regulated under the Natural Gas Pipeline Safety Act of 1968, or the Hazardous Liquid Pipeline Safety Act of 1979, or which is an intrastate pipeline facility regulated under State laws;

5. surface impoundments, pits, ponds, or lagoons;

6. storm water or waste water collection systems;

7. flow-through process tanks;

8. liquid traps or associated gathering lines directly related to oil or gas production and gathering operations;

9. storage tanks situated in an underground area (such as a basement, cellar, mine-working, drift, shaft, or tunnel) if the storage tank is situated upon or above the surface of the floor.

What Substances Are Covered? The notification requirements apply to underground storage tanks that contain regulated substances. This includes any substance defined as hazardous in section 101 (14) of the Comprehensive Environmental Response, Compensation and Liability Act of 1980 (CERCLA), with the exception of those substances regulated as hazardous waste under Subtitle C of RCRA. It also includes petroleum, e.g., crude oil or any fraction thereof which is liquid at standard conditions of temperature and pressure (60 degrees Fahrenheit and 14.7 pounds per square inch absolute).

Where To Notify? Completed notification forms should be sent to the address given at the top of this page.

When To Notify? 1. Owners of underground storage tanks in use or that have been taken out of operation after January 1, 1974, but still in the ground, must notify by May 8, 1986. 2. Owners who bring underground storage tanks into use after May 8, 1986, must notify within 30 days of bringing the tanks into use.

Penalties: Any owner who knowingly fails to notify or submits false information shall be subject to a civil penalty not to exceed \$10,000 for each tank for which notification is not given or for which false information is submitted.

INSTRUCTIONS

Please type or print in ink all items except "signature" in Section V. This form must be completed for each location containing underground storage tanks. If more than 5 tanks are owned at this location, photocopy the reverse side, and staple continuation sheets to this form.

FROM: 0300297

OWNER/OPERATOR Contley Brothers Exxon

* (1) Must continue to monitor tanks monthly for releases or empty tanks (<1" of material) now. Submit statement to this inspector after you empty tank or copy of monthly monitoring results for March, 2007.

* (2) Even though tanks are not in use you must continue to test corrosion/cathodic protection system or permanently close tanks. Submit last cathodic protection test result to this inspector or if system hasn't been tested within the last three years have a Class "D" / "E" certified individual test system now submitting results to this inspector by 4/8/07

(3) Must continue to maintain financial responsibility (tank insurance)

(4) If tanks are to be permanently closed (Class "B") must submit written notice to obtain a closure permit

TO THE TANK OWNER AND OPERATOR

Additional information is required to determine compliance with the provisions of Chapter 22, Article 17 Section(s) 40 CFR 280.31 of the Rules and Regulations in that you

- Need to submit copy of cathodic protection test results to this inspector. Corrosion/cathodic protection of tanks and piping must be tested every three years by a Class "D" / "E" certified individual

- If tanks are to be permanently closed submit a written letter to this inspector to obtain a closure permit (Class "B")

You shall submit the required information on or before the 13 day of June, 2007.

FAILURE TO CONDUCT THE REQUIRED INVESTIGATION WITHIN THE TIME SPECIFIED MAY RESULT IN THE ISSUANCE OF A NOTICE OF NON-COMPLIANCE OR AN ADMINISTRATIVE ORDER.

LOCATION OF TANK SYSTEMS:

Facility Name: <u>Cantley Brothers Exxon</u>	Address: <u>Rt 94</u>
City: <u>Racine</u>	County: <u>Boone</u> Phone: _____

Information received from an inspection conducted on or about the 6 day of June, 2007, on the above facility has revealed that you are the owner and/or operator of the underground storage tank systems and you are in violation of the provisions of Chapter 22, Article 17, Section 6 of the code of West Virginia and/or Section(s) 42 CFR 280.70 of the Rules and Regulations in that you

Failed to have cathodic protection system for underground storage tanks tested every three years to make sure corrosion protection is being maintained

Therefore, pursuant to the authority contained in Chapter 22, Article 17, of the Code of West Virginia, you are hereby notified that you are in VIOLATION of the provisions of the Code of West Virginia as described above. You should accomplish the following remedial measures on or before the 30 day of June, 2007:

Have a class D/E certified individual test cathode protection system making any necessary repairs or have tanks permanently closed.
-Submit a copy of test results to this inspector

NOTICE

The Director may issue an Administrative Order and/or may commence a Civil Action in the Circuit Court, including a temporary or permanent injunction in accordance with West Virginia Code, Chapter 22-17-15 and you may be liable for a civil penalty in accordance with Chapter 22-17-16.

TO THE OWNER AND OPERATOR:

WHEREAS, AN INSPECTION MADE ON OR ABOUT THE 25 DAY OF July, 19 2003, ON YOUR UNDERGROUND STORAGE TANK FACILITY AT THE ABOVE LOCATION REVEALED THAT A RELEASE OF A REGULATED SUBSTANCE MAY HAVE OCCURRED BASED ON THE FOLLOWING:

(Mark all that apply [])

- 1. The discovery of released regulated substance at the UST site or in the surrounding area. Explain: _____
- 2. Unusual operating conditions of UST system equipment that may indicate a release of regulated substance. Explain: Hole in bottom of regular tank discovered when
- 3. Monitoring results of the release detection system indicate a release may have occurred. Explain: _____

THEREFORE, PURSUANT TO THE AUTHORITY CONTAINED IN CHAPTER 20, ARTICLE 5H, OF THE CODE OF WEST VIRGINIA, YOU ARE HEREBY REQUESTED TO IMMEDIATELY INVESTIGATE AND CONFIRM THE RELEASE AT YOUR FACILITY USING THE FOLLOWING PROCEDURES AND REPORT THE RESULTS WITHIN 7 DAYS.

(Mark all that apply []) Tank had failed tightness test

- A. System test: Conduct a tank tightness test to determine if a leak exists in that portion of the tank that routinely contains product, including the attached piping.
- B. Site check: Conduct an initial site check in the area surrounding the UST system where contamination is most likely to be present. WUDEP Office of Environmental Remediation will sample near tank wells (7-21-03)

IF A RELEASE IS CONFIRMED YOU MUST TAKE THE FOLLOWING INITIAL RESPONSE ACTIONS WITHIN 24 HOURS:

1. Report the release by telephone [(304) 558-6371] and follow-up the report with written correspondence to the Office of Waste Management, Underground Storage Tank Section.
2. Take immediate action to prevent any further release.
3. Identify and mitigate fire, explosion, and vapor hazards both on and off site.

WARNING

If you are the owner and/or operator and you fail to accomplish the above-described measures within the time specified, the Director may issue an Administrative Order and/or may commence a Civil Action in the Circuit Court, including a temporary or permanent injunction in accordance with West Virginia Code, Chapter 20-5H-15 and you may be liable for a civil penalty in accordance with Chapter 20-5H-16.

CERTIFIED RETURN RECEIPT REQUESTED

Dear Mr. Cantley:

Enclosed please find a fully executed copy of Order No. UST-10-007, effective June 30, 2009.

Please note the requirements under the Order for Compliance. Every effort should be made to comply with the terms of this Order. Specifically, a proposed corrective action plan is due on or before July 30, 2010. Also, please be advised that the civil administrative penalty is due in accordance with the payment schedule outlined in the Order for Compliance. All payments applicable to the civil administrative penalty should be addressed and mailed as indicated in the Order for Compliance.

Should you have any questions regarding this matter, please contact Joseph M. Sizemore, Assistant to the Chief Inspector, at (304) 926-0470.

Sincerely,

Michael A. Zeto
Chief Inspector

**CONSENT ORDER
ISSUED UNDER THE
UNDERGROUND STORAGE TANK ACT
WEST VIRGINIA CODE, CHAPTER 22, ARTICLE 17**

TO: Lester Cantley Jr.
P.O. Box 62
Racine, WV 25165

DATE: June 22, 2010

ORDER NO.: UST-10-007

INTRODUCTION

This Consent Order is issued by the Director of the Division of Water and Waste Management (hereinafter "Director"), under the authority of West Virginia Code, Chapter 22, Article 17, Section 1 et seq. to Lester Cantley Jr. (hereinafter "Cantley").

FINDINGS OF FACT

In support of this Order, the Director hereby finds the following:

1. Cantley is the owner/operator of three temporarily out-of-service underground storage tank(s) (USTs) located at Racine, Boone County, West Virginia. This facility operates under WV Identification # 0300297.
2. On March 26, 2007, West Virginia Department of Environmental Protection (WVDEP) personnel received a request for a closure permit to remove the three USTs. Closure number C-7327-07 was issued by WVDEP on April 2, 2007.
3. An information request was mailed to Cantley on May 22, 2007, asking for the last corrosion protection system 3 year test results. The results were required to be submitted by June 10, 2007.
4. A Notice of Violation (NOV) No. 0706-0798 was issued to Cantley on June 6, 2007, after WVDEP personnel received a report from Cantley that did not provide information that demonstrated that Cantley had brought its USTs into compliance. Cantley was notified that it needed to have the cathodic/corrosion protection system of its USTs tested by a

Promoting a healthy environment.

- class D or E certified individual, and that its USTs had to contain less than one inch of product or be monitored for release detection once every thirty (30) days.
5. On March 9, 2009, WVDEP personnel conducted an inspection of the Cantley USTs. The USTs were empty, but no corrosion protection test reports were available for inspection.
 6. On May 5, 2009, WVDEP met with Cantley to discuss its USTs. Cantley verbally agreed to have its USTs tested for corrosion protection. Cantley was allowed thirty (30) days to complete the corrosion protection test.
 7. On June 9, 2009, WVDEP personnel issued NOV No. 0906-0661 to Cantley for failure to test its USTs corrosion protection system once every three years, a violation of Code of Federal Regulations Title 40, Part 280, Section 31(b)(1) (40CFR280.31(b)(1)).
 8. On August 18, 2009, WVDEP personnel issued an Inspection of Violation informing Cantley that its USTs were not in compliance with UST regulatory requirements.
 9. In March 2010, WVDEP personnel conducted a file review and observed and documented that Cantley has not adequately addressed violations at his facility.
 10. On June 3, 2010, WVDEP received corrosion protection testing results for the Cantley site. The results indicate that the testing was completed on July 9, 2009 and that the "super" tank failed the cathodic protection test.
 11. On June 10, 2010, Cantley met with WVDEP personnel to discuss draft Order No. UST-10-007. The discussion yielded that the cathodic protection system on the "super" tank has not been repaired and that Cantley had still violated the requirement to have its cathodic protection tested at least once every three years.

ORDER FOR COMPLIANCE

Now, therefore, in accordance with Chapter 22, Article 17, Section 1 et seq. of the West Virginia Code, it is hereby agreed between the parties, and ORDERED by the Director:

1. Cantley shall immediately take all measures to initiate compliance with all terms and conditions of this Order.
2. Within thirty (30) days of entry of this Order, Cantley shall submit for approval a proposed corrective action plan and schedule, outlining how and when Cantley will achieve compliance with all pertinent laws and rules. In this plan Cantley will demonstrate how it shall properly permanently close its USTs according to all applicable regulatory requirements, or how it shall maintain corrosion protection on its temporarily out-of-service USTs according to the requirements of 40CFR270(a), and provide proof of corrosion protection testing and financial responsibility for its USTs. Submittal shall be mailed to:

**UST Program Manager
WVDEP/EE/UST
601 57th Street SE
Charleston, WV 25304**

3. Because of Cantley's Federal Code violations, Cantley shall be assessed a civil administrative penalty of two thousand four hundred seventy-five dollars (\$2,475) to be paid to the West Virginia Department of Environmental Protection for deposit in the Underground Storage Tank Administrative Fund in accordance with the following payment schedule:

Payment 1 in the amount of \$206.25 due on or before July 15, 2010
Payment 2 in the amount of \$206.25 due on or before August 15, 2010
Payment 3 in the amount of \$206.25 due on or before September 15, 2010
Payment 4 in the amount of \$206.25 due on or before October 15, 2010
Payment 5 in the amount of \$206.25 due on or before November 15, 2010
Payment 6 in the amount of \$206.25 due on or before December 15, 2010
Payment 7 in the amount of \$206.25 due on or before January 15, 2011
Payment 8 in the amount of \$206.25 due on or before February 15, 2011
Payment 9 in the amount of \$206.25 due on or before March 15, 2011
Payment 10 in the amount of \$206.25 due on or before April 15, 2011
Payment 11 in the amount of \$206.25 due on or before May 15, 2011
Payment 12 in the amount of \$206.25 due on or before June 15, 2011

Payments made pursuant to this paragraph are not tax-deductible for purposes of state or federal law. **Payment shall be mailed to:**

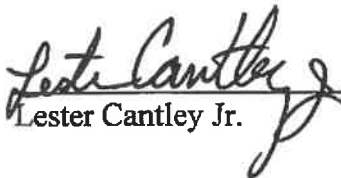

**Chief Inspector
Environmental Enforcement – Mail Code #031328
WV-DEP
601 57th Street SE
Charleston, WV 25304**

OTHER PROVISIONS

1. Cantley hereby waives its right to appeal this Order under the provisions of Chapter 22, Article 17, Section 18 of the Code of West Virginia. Under this Order, Cantley agrees to take all actions required by the terms and conditions of this Order and consents to and will not contest the Director's jurisdiction regarding this Order. However, Cantley does not admit to any factual and legal determinations made by the Director and reserves all rights and defenses available regarding liability or responsibility in any proceedings regarding Cantley other than proceedings, administrative or civil, to enforce this Order.
2. The Director reserves the right to take further action if compliance with the terms and conditions of this Order does not adequately address the violations noted herein and reserves all rights and defenses which he may have pursuant to any legal authority, as

well as the right to raise, as a basis for supporting such legal authority or defenses, facts other than those contained in the Findings of Fact.

3. If any event occurs which causes delay in the achievement of the requirements of this Order, Cantley shall have the burden of proving that the delay was caused by circumstances beyond its reasonable control which could not have been overcome by due diligence (i.e., force majeure). Force majeure shall not include delays caused or contributed to by the lack of sufficient funding. Within three (3) working days after Cantley becomes aware of such a delay, notification shall be provided to the Director/Chief Inspector and shall, within ten (10) working days of initial notification, submit a detailed written explanation of the anticipated length and cause of the delay, the measures taken and/or to be taken to prevent or minimize the delay, and a timetable by which Cantley intends to implement these measures. If the Director agrees that the delay has been or will be caused by circumstances beyond the reasonable control of Cantley (i.e., force majeure), the time for performance hereunder shall be extended for a period of time equal to the delay resulting from such circumstances. A force majeure amendment granted by the Director shall be considered a binding extension of this Order and of the requirements herein. The determination of the Director shall be final and not subject to appeal.
4. Compliance with the terms and conditions of this Order shall not in any way be construed as relieving Cantley of the obligation to comply with any applicable law, permit, other order, or any other requirement otherwise applicable. Violations of the terms and conditions of this Order may subject Cantley to additional penalties and injunctive relief in accordance with the applicable law.
5. The provisions of this Order are severable and should a court or board of competent jurisdiction declare any provisions to be invalid or unenforceable, all other provisions shall remain in full force and effect.
6. This Order is binding on Cantley, its successors and assigns.
7. This Order shall terminate upon Cantley's notification of full compliance with the "Order for Compliance" and verification of this notification by WVDEP.

Dear Mr. Cantley:

Enclosed is the report for the Compliance Monitoring Inspection (CMI) conducted at Cantley Brother's Exxon (WV ID# 0300297) on 12/3/2012. One or more significant deficiencies were noted during the inspection; therefore, you will find one or more Notices of Violation (NOV) enclosed with this correspondence.

Your immediate attention should be given to the violation(s) listed in the report and the attached Notice(s) of Violation (NOV). Be guided by the attached Notice of Violation(s) as how to advise the West Virginia Department of Environmental Protection (WVDEP) as to your plan to bring your facility back into compliance.

Your immediate attention should be given to the deficiencies noted in the enclosed documents. Failure to take corrective action to eliminate deficiencies may result in enforcement action as outlined in Chapter 22, Article 17 of the West Virginia Code.

If you have any questions, please contact the UST Inspector, Michael Young, at (304) 926 0499 ext 1318.

Sincerely,

Ruth M. Porter

- 1 1) All three of the tanks contain one inch or less of residue each.
- 2
- 3 2) The last cathodic protection system test was conducted on 7/9/2009. The results of this test indicated that
- 4 the regular and mid-grade tanks passed, however the premium tank failed to meet the minimum voltage
- 5 requirement.
- 6
- 7 3) The underground tank rules require tank owners to permanently close tanks that have been out of service for
- 8 more than twelve months if they do not meet upgrade standards. The premium tank, that failed the cathodic
- 9 protection test in 2009, and the regular and plus tanks, that have not been tested within three years of the
- 10 7/9/2009 date, no longer meet the upgrade standard. Therefore all three of the tanks should be permanently
- 11 closed.
- 12
- 13 4) During the inspection the tank owner stated that the facility does not have tank insurance.
- 14
- 15 5) There was no record presented during the inspection to show that the facility has a designated and trained
- 16 Class A/B operator.
- 17
- 18 6) The bolt of the top expansion ring on the regular tank spill basin is missing.
- 19
- 20 7) The location of the piping check valves could not be visibly identified.
- 21
- 22
- 23

Address: <u>P.O. Box 62, Racine, WV</u>	Zip: <u>25165</u>	Address: <u>0</u> Zip: <u>0</u>
E-Mail: _____	E-Mail: _____	

Information received from an inspection conducted on or about the 03 day of December, 2012, on the above facility has revealed that the owner and/or operator of the underground storage tank (UST) system(s) is in violation of the provisions of Chapter 22, Article 17, Section 6 of the Code of West Virginia and/or Section(s):

40CFR 280.70(c) of the Rules and Regulations in that the owner/operator failed to permanently close a temporarily closed tank system that does not meet performance standards after 12 months.

Therefore, pursuant to the authority contained in Chapter 22, Article 17, of the Code of West Virginia, the owner/operator is hereby notified that the owner/operator is in VIOLATION of the provisions of the Code of West Virginia as described above. In order to correct the violations cited above, the following corrective measures are necessary:

Comply with the above cited rule.

Issuer Contact michael.w.young@wv.gov, 601 57th Street, Charleston, WV 25304; phone 926-0499 ext. 1318;

CERTIFIED RETURN RECEIPT REQUESTED

Dear Mr. Cantley:

91 7199 9991 7032 6243 6418

Enclosed is the follow up inspection report for Cantley Brother's Exxon(WV ID# 0-300297) on 1/7/2013. One or more significant deficiencies were noted during the inspection; therefore, you will find one or more Notices of Violation (NOV) enclosed with this correspondence.

I am in receipt of your letter dated January 2, 2013 concerning your financial inability to have the tanks at the site removed. While I understand that you are suffering financial difficulties that does not relieve your of the responsibility for compliance with the law. I will proceed with issuing an administrative order for your facility. You will be able to schedule a meeting concerning the order and present information concerning your situation at that time.

Your immediate attention should be given to the deficiencies noted in the enclosed documents. Failure to take corrective action to eliminate deficiencies may result in enforcement action as outlined in Chapter 22, Article 17 of the West Virginia Code.

If you have any questions, please contact me at 304-926-0499, extension 1007.

Sincerely,

Ruth M. Porter
UST Program Manager

Address: 3167 SHORT CREEK RD.		Address: 3167 SHORT CREEK RD.	
City: RACINE	State: WV 25163	City: RACINE WV 25163	County:

III. REASON SURVEY WAS CONDUCTED (mark only one)	<input checked="" type="checkbox"/> Routine – 3 year <input type="checkbox"/> Routine – within 6 months of installation/upgrade/modification <input type="checkbox"/> Re-survey upon achievement of steady-state polarization immediately following upgrade/modification (complete Section IX)
---------------------------------------------------------	---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------

IV. CATHODIC PROTECTION TESTER'S EVALUATION (mark only one)

<input type="checkbox"/> PASS	All protected structures at this facility pass the cathodic protection and continuity survey (indicate all criteria applicable by completion of Section V). No further action is necessary at this time. Next test is due in 3 years.
<input checked="" type="checkbox"/> FAIL	One or more protected structures at this facility fail the cathodic protection and/or continuity survey. Refer to a corrosion expert for further evaluation OR permanently close.
<input type="checkbox"/> INCONCLUSIVE	If the remote and the local do not both indicate the same test result on all protected structures (both pass or both fail), inconclusive is indicated and/or if the continuity survey indicates inconclusive or continuous results, a corrosion expert must evaluate the survey and complete Section VI.

Tester Name: THOMAS HALL	WVDEP Certification Number: #ABDE 411
Company Name: SUPERIOR SERVICES	Certifying Organization & Number (e.g., NACE): NACE # 8414
Address: PO BOX 982	Certification Type (e.g., CP Tester, CP Technician): CORROSION TECHNICIAN
City: HENDERSONVILLE	State: NC
Zip: 28793	Phone: 828-698-6298

CP Tester's Signature: <i>Thomas Hall</i>	Date Signed: 2/4/13	Date CP Survey Performed: 1/29/13
-------------------------------------------	-------------------------------	---------------------------------------------

V. CRITERIA APPLICABLE TO TESTER'S EVALUATION (mark all that apply)

<input checked="" type="checkbox"/> 850 mV ON	Structure-to-soil potential more negative than -850 mV with respect to a Cu/CuSO ₄ reference electrode with protective current applied (This criterion is applicable to any galvanic protected structure).
<input type="checkbox"/> 850 mV Instant OFF	Structure-to-soil potential more negative than -850 mV with respect to a Cu/CuSO ₄ reference electrode with protective current temporarily interrupted (This criterion is applicable only to those galvanic systems where the anodes can be disconnected).
<input type="checkbox"/> 100 mV Polarization	Structure tested exhibits at least 100 mV of cathodic polarization. (This criterion is applicable only to those galvanic systems where the anodes can be disconnected).

VI. CORROSION EXPERT'S EVALUATION IF REQUIRED (mark only one)

The survey must be conducted and/or evaluated by a corrosion expert when: a) an inconclusive is indicated for any protected structure since both the local and the remote structure-to-soil potentials do not result in the same outcome; b) upgrades to steel piping protected by galvanic systems are conducted; c) supplemental anodes are added to the tanks and/or piping without following an accepted industry code; or d) when required by WVDEP.

<input type="checkbox"/> PASS	All protected structures at this facility are judged to have adequate cathodic protection and therefore pass the CP and continuity survey. Indicate all criteria applicable: <input type="checkbox"/> -850 mV ON <input type="checkbox"/> -850 mV Instant OFF <input type="checkbox"/> 100 mV Polarization
<input type="checkbox"/> FAIL	One or more tested structures at this facility do not pass the CP and/or continuity survey and it is judged that adequate CP is not currently being provided to the UST system (indicate what action is necessary by completion of Section VII).

Corrosion Expert's Name:	WVDEP Class D Cert. #:	NACE Int'l Cert. Type: Professional Engineer (PE) Specialty:		
Company Name:	NACE Int'l Cert. Number or RPE Number State:			
Address:	City:	State:	Zip:	Phone:
Corrosion Expert's Signature:				Date:

VII. ACTION REQUIRED AS A RESULT OF EXPERT'S EVALUATION (mark only one)

<input type="checkbox"/> NONE	Cathodic protection (CP) is adequate. No further action is necessary at this time.
<input checked="" type="checkbox"/> UPGRADE & RETEST	Cathodic protection is not adequate. Immediately upgrade per industry standard or corrosion expert design OR permanently close. If upgraded, system must be retested within 6 months after the upgrade.

Next cathodic protection survey due (required every 3 years and within 6 months of upgrades)

CATHODIC PROTECTION — GALVANIC

VIII. DESCRIPTION OF UST SYSTEM

TANK #	PRODUCT STORED (PREMIUM, DIESEL, ETC.)	TANK CAPACITY (GAL)	CONSTRUCTION MATERIAL			FLEX CONNECTORS (Bonded, isolated, booted, anode, N/A)
			TANKS	PIPING	SIPHON LINE	
1	REGULAR	6,000	STI-P3	STEEL		anode
2	PLUS	6,000	STI-P3	STEEL		anode
3	SUPER	4,000	STI-P3	STEEL		anode
4						
5						
6						
7						
8						
9

11						
12						
13						
14						
15						
16						
17						
18						
19						
20						

IX. DESCRIPTION OF CATHODIC PROTECTION SYSTEM UPGRADES AND/OR MODIFICATIONS:

Cathodic protection systems must be evaluated within 6 months after any upgrades and/or modifications. Complete this section if any upgrades or modifications were made to the cathodic protection system in response to a "failed" evaluation. Certain upgrades/modifications as determined by WVDEP are required to be designed and/or evaluated by a corrosion expert (completion of Section VI required).

- Supplemental anodes for a StI-P3 tank were added (attach corrosion expert's design or document industry standard used).
- Supplemental anodes for metallic pipe or flex-connectors were added (attach corrosion expert's design or document industry standard used).
- Galvanically protected tanks/piping not electrically isolated (explain upgrades/modifications completed in "Remarks/Other" below).

Remarks/Other: TANKS ARE STI-P3. THE SUPER TANK WILL NOT MEET CRITERIA. PIPING IS STEEL. IT HAS BEEN PROTECTED WITH SACRIFICIAL ANODES. THERE IS NO DIELECTRIC UNIONS BETWEEN THE PIPING AND THE SUCTION PUMPS, BUT THE PIPING WILL STILL MEET CRITERIA. THERE IS THREE LOCATIONS WHERE THE STEEL PIPING IS STUBBED UP BUT THERE IS NO SUCTION PUMPS.

CATHODIC PROTECTION — GALVANIC

X. UST FACILITY SITE DRAWING

Attach detailed drawing of the UST and cathodic protection systems. Sufficient detail must be given in order to clearly indicate where the reference electrode was placed for each structure-to-soil potential that is recorded on the survey forms. Any pertinent data must also be included. At a minimum you should indicate the following: All tanks, piping and dispensers; All buildings and streets; All anodes and wires; Location of CP test stations; Each reference electrode placement must be indicated by a code (e.g., 1,2,3... T-1, T-2, P-1, P-2... etc.), corresponding with the appropriate line number in Section XII of this form.

AN EVALUATION OF THE CATHODIC PROTECTION SYSTEM IS NOT COMPLETE WITHOUT AN ACCEPTABLE SITE DRAWING.

CATHODIC PROTECTION — GALVANIC

Pg. 6 of 5

XII. CATHODIC PROTECTION SYSTEM SURVEY

- This section must be used to document a survey of a galvanic system by obtaining structure-to-soil potential measurements.
- At a minimum the reference electrode must be placed in the soil at both ends and the middle centerline of each tank and both ends of each piping run.
- STIP3 tank alternative: In lieu of the above method, a reading may be taken over the center of the tank midline and 1 remote reading at least 30' away from the structure being tested.
- Both the local and the remote voltage must be -850 mV or more negative to pass.
- Inconclusive is indicated when both the local & remote structure-to-soil potentials do not result in the same outcome (Both must pass or both fail)
- If the 100 mV polarization method is used to verify adequate CP on a system for which anodes can be disconnected, please use page 5 of the CATHODIC PROTECTION IMPRESSED CURRENT form.

FACILITY NAME: CANTLEY EXXON **NOTE: The survey is not complete unless all other applicable parts of this form are also**

COMMENTS: THE SUPER TANK WILL NOT MEET CRITERIA.

- 1) Designate numerically or by code on the site drawing each "local" reference electrode placement (e.g., 1,2,3... T-1, T-2, P-1, P-2...etc.).
- 2) Describe the structure that is being tested (e.g., plus tank; premium piping; diesel submersible pump flex connector; etc.).
- 3) Describe where contact with the structure being tested is made (e.g., T1 test lead, plus tank bottom; diesel piping @ dispenser 7/8; PP4, etc.).
- 4) Describe the exact location where reference electrode is placed for each measurement (e.g., soil @ regular tank STP manway; soil @ dispenser 2, etc.).
- 5) Record the structure-to-soil potential measured with the reference electrode placed "local" in millivolts (e.g., -865 mV, -920 mV, etc.).
- 6) Record the structure-to-soil potential measured with the reference electrode placed "remote" (copy voltage that was obtained during continuity survey).
- 7) Indicate if the tested structure passed or failed the -850 mV "on" criterion based on your interpretation of data.

TEST PROCEDURES:

To obtain the necessary field data a series of structure-to-electrolyte potential measurements were obtained at represented locations on the structures under consideration. The structure-to-electrolyte potentials were obtained utilizing a copper/copper sulfate reference electrode placed in contact with the electrolyte (soil) directly over or as close as possible to the structure under consideration. Readings were obtained with the use of a high impedance volt meter with digital readout. The negative or structure connection on Sti-p3 tanks in question, was made via the tank test lead when available. When this test lead was not available the interior of the tank was contacted with a copper lead. All other structure connections were made from direct contact to the structure in question. To meet criteria the structure in question must have a potential of at least -.850 mv.

To: Mr. Sizemore
From: Cantleys Exxon

Subject: Standard operating procedures

Sir, the attached is my revision of the standard operating procedure for leak detection. Please advise if this does not fully meet the requirements. With kind regards, I am;

Charlotte L Cantley

#0300297 cc: J Sizemore
J Peterson
R. A. Fowler

STANDARD OPERATING PROCEDURES FOR CONDUCTING LEAK DETECTION

Cantley's Exxon
3199 Short Creek Rd.
RACINE W.V. 25165-0062
Phone # (304) 837-8331
WVID#0300297

Number of tanks 4
Sizes 1-6000 gal's Regular Unleaded gasoline
1-6000 gal's Unleaded Plus gasoline
1-4000 gal's Supreme Unleaded gasoline
1-3000 gal's Diesel Fuel
Type of piping- Suction Piping

Types of leak detection used- Groundwater monitoring/Manual tank gauging.

Person conducting leak detection- Randall L Adkins/ Opal Cantley

Leak detection conducted at intervals.

- Groundwater monitoring-Monthly.
- Manual Tank Gauging

Randall Adkins is responsible for pass or fail result status.

Release detection results- recorded every thirty days and maintained on file for 1(one) year.

Line tightness test required- once every three years
Last completed satisfactory test- July 25,2003
Next required test of Line tightness- July 26, 2006
Record will be maintained- 3 years

Confirmed release or test failure is to be reported within 24(twenty-four) hours to (304) 924-6211/ 1(800) 642-3074

1. The above named employee's will check the fluid levels of the underground storage tanks manually, once every twenty four hours of operation.
2. These records will be logged and mailed monthly for review for a period of 6 months.
3. Employees will further check the distribution reading of all gas delivery pumps upon completion of each business day.
4. Each of these means will be checked against the other to ensure that there aren't any discrepancies in the amount of fuel of the underground storage facility.
5. In the event that the levels do not correlate, either plus or minus, the authorities shall be notified within 24 hours at 1-(304) 924-6211 or 1-(800) 642-3073.
6. These readings shall also be ascertained prior to, and upon completion, of delivery of petroleum products.

ORDER
ISSUED UNDER THE
UNDERGROUND STORAGE TANK ACT
CHAPTER 22, ARTICLE 17 OF THE WEST VIRGINIA CODE
ORDER NUMBER UST-03-063

Charlotte Cantley
Cantley's Exxon
PO Box 62
Racine, WV 25165

WVID: 0300297

ATTENTION: CHARLOTTE CANTLEY

This Order is issued by the Cabinet Secretary of the West Virginia Department of Environmental Protection through her authorized representative, the Assistant Director of the Division of Water & Waste Management (hereinafter, "Assistant Director"), under the authority of the West Virginia Code (hereinafter, the "Code"), Chapter 22, Article 17 to Cantley's Exxon, (hereinafter, "Owner"). The Cabinet Secretary has adopted and incorporated by reference the applicable Sections of 40 CFR, Part 280 into the West Virginia Underground Storage Tank Rules, Title 33, Series 30 (hereinafter, the "Rules").

FILE COPY

BASIS FOR ORDER

The Owner is a "Person" as defined by 22-17-3 of the Code. The Owner is the "Owner", as defined by 22-17-3 of the Code, of three (3) Underground Storage Tanks (hereinafter, "UST's") located at Cantley's Exxon, State Route 3, Racine, in the county of Boone, West Virginia, WVID# 0300297, (hereinafter, "Facility").

On March 27, 2003, Environmental Inspector Jamie Peterson conducted a Compliance Evaluation Inspection of the facility.

During the inspection, it was discovered that release detection was not being properly conducted for the three USTs at the facility, in violation of 40 CFR 280.41(a).

On March 27, 2003, a Notice of Non-Compliance (NON), number 03030624, was written for the above violation.

In support of this order, the Assistant Director hereby finds that the Owner:

1. Failed to properly monitor the three UST's at the facility for release detection using one of the methods listed in 40 CFR 280.43(d) through (h), in violation of 40 CFR 280.41(a).

A meeting was held to discuss the term of this order in Charleston, WV on December 2, 2003. In attendance were Joseph Sizemore, James Peterson, Michael Stratton, Randell Adkins, and Charlotte Cantley.

REQUIREMENTS OF ORDER

Now, therefore, in accordance with Chapter 22, Article 17, Section 15 of the Code, it is hereby agreed between the parties and ORDERED by the Assistant Director as follows:

1. Upon the effective date of this ORDER, the Owner shall begin to perform proper release detection on the three UST's at this facility.
2. Within ninety (90) days of the effective date of this ORDER, the Owner shall submit the first monthly report of release detection results, and shall continue to submit monthly reports of release detection results for a period of six (6) consecutive months following implementation of release detection at this facility.
3. Within sixty (60) days of the effective date of this ORDER, the Owner shall submit a Standard Operating Procedure (SOP) outlining the steps to be taken to perform proper release detection, incorporating one of the approved methods set forth in 40 CFR 280.43(d) through (h).
4. Within thirty (30) days of approval of the SOP, the Owner shall train all persons that will perform the release detection at the facility.
5. Upon completion of the training, the Owner shall submit proof of the training. This document shall include the signature of the person(s) trained and the date of the training.
6. Document Approval--Any document submitted in compliance with this ORDER shall be subject to the following review and approval procedure.
 - a) The Assistant Director shall have the option of approving the proposed document as submitted, modifying the document, requiring the Owner to modify the document, or rejecting the document.
 - b) If the Assistant Director rejects the document or requires the Owner to modify the document, the Owner shall, within 15 days of notification of rejection or required modification, submit a new or revised document that shall be subject to the approval procedure outlined above.

- c) If a submitted document is a plan for actions to be taken by the Owner, upon approval of the plan by the Assistant Director, the plan, including the schedule for its completion, shall be considered a legal and binding agreement between the parties and, therefore, shall become a Requirement of this ORDER.
7. Administrative Settlement--As an administrative settlement for the violations cited in this ORDER, the Owner shall pay \$4,125 (Four Thousand, One Hundred, Twenty Five Dollars). Within thirty (30) days of the effective date of this ORDER, the Owner shall pay the amount owed to the West Virginia Underground Storage Tank Administrative Fund (hereinafter, "Fund"). The number of this ORDER, UST-03-063, shall be written upon the face of the check.
8. Stipulated Penalties--In the event that one or more of the Requirements of this ORDER is not completed satisfactorily, the Owner shall pay a stipulated penalty of \$1,000 (One Thousand Dollars) for each day or portion of a day that any Requirement remains incomplete. Stipulated penalties shall be paid by check made payable to the Underground Storage Tank Administrative Fund. The number of this order, UST-03-063, shall be written upon the face of the check.
9. Reasonable Approval--The Assistant Director shall not unreasonably withhold approval of actions performed by the Owner.
10. Force Majeure--If any event occurs which causes delay in the achievement of the Requirements of this ORDER, the Owner shall have the burden of proving that the delay was caused by circumstances beyond its reasonable control which could not have been overcome by due diligence (i.e., force majeure).
- a) Within three (3) working days of the Owner's becoming aware of such a delay, it shall notify the Assistant Director orally.
- b) Within ten (10) working days of oral notification, the Owner shall submit a detailed written explanation of the anticipated length and cause of the delay, the measures taken and/or to be taken to prevent or minimize the delay, and a timetable by which the Owner intends to implement these measures.
- c) If the Assistant Director agrees that the delay or anticipated delay has been or will be caused by circumstances beyond the reasonable control of the Owner (i.e., force majeure), the Assistant Director will extend the time for performance hereunder for a period of time equal to the length of the unavoidable delay.
- d) A force majeure amendment granted by the Assistant Director shall be considered a binding extension of this ORDER and of the Requirements herein.
11. Submissions--Written communications, reports, payments, and other materials to be submitted under the Requirements of this ORDER shall be delivered within the times specified in the Requirements to:

Joseph Sizemore
Environmental Resources Specialist
Administrative Enforcement Section
1356 Hansford Street
Charleston, WV 25301

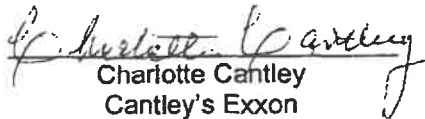

12. Submission of Copies—Copies of documents shall be delivered to the inspector at the following address in accordance with the time limits specified in the Requirements:

James Peterson —
Environmental Inspector
Division of Water and Waste Management
1356 Hansford Street
Charleston, WV 25301

GENERAL PROVISIONS

1. The Assistant Director expressly reserves all rights and defenses which he may have pursuant to any legal authority as well as a right to raise, as a basis for supporting such legal authority or defenses, facts other than those enumerated in the Basis for Order.
2. The Owner hereby waives its right to appeal this Order under the provisions of Chapter 22, Article 17, Section 18 of the Code. Under this Order, the Owner agrees to undertake all actions required by the terms and conditions of this Order, and consents to and will not contest, the Assistant Director's jurisdiction regarding this Order. However, the Owner does not admit to any factual or legal determination made by the Assistant Director in this Order and reserves all rights and defenses available regarding liability and responsibility in any proceedings regarding the facility other than proceedings, either administrative or civil, to enforce this Order.

Dear Opal:

This data was a little rough make sure they stick as close as possible. But all three tanks did pass. We did not receive your Diesel tank data. Please send at your earliest convenience date.

Jan. 04

We appreciate your business. If you have any questions, please give me a call at 1-800-793-1919.

Best regards,

Jim Flynn

Is. Roberts:

Thank you for choosing Sir International as your SIR vendor. I hope we have a long and mutually beneficial business relationship.

Please remember that the "secret" to SIR is accuracy. If you measure the product in your tanks accurately then you will most probably be pleased with your SIR results. Remember that the regulations mandate that anyone who uses SIR as their leak detection method must measure the product in their tanks each day that they are open, and must measure to the nearest $\frac{1}{8}$ inch.

Again, thank you for choosing Sir International.

Federal and State regulations mandate that you measure the product in your tanks each day that you are open -- even if you don't pump any product. Failure to measure the product in your tanks could result in a fine. Reporting a stick reading that you DID NOT ACTUALLY MEASURE is a felony in most states.

If you have a failure (a loss, a gain, or an inconclusive) you must report the failure to your local regulatory office within 24 hours of the time that you receive this report. Please read the "Investigative Protocol".

Keep these reports at your site so that you can show them to your regulatory agent if they drop by and want to see them. If I can be of any further assistance, please do not hesitate to call me.

Tank Tightness Tests Results

TEST TYPE: VacuTect

TANK ID	PRODUCT	TANK CAPACITY	TANK DIAMETER	TANK MATERIAL	PRODUCT LEVEL	EXTERNAL WATER LEVEL	TEST RESULT
1	PREMIUM	4,000	64.00	STEEL W/CP	22.50	103.00	PASS
2	PLUS	6,000	96.00	STEEL W/CP			
3	REG UNLEAD	6,000	96.00	STEEL W/CP			

*Where regulations require, for VacuTect external water level may be depth of dry well or water is assumed at lowest point that can be confirmed dry.

INDIVIDUAL TANK INFORMATION AND TEST RESULTS

TEST DATE: 06/21/04
 CLIENT: CANTLEY'S EXXON

8900 SHOAL CREEK, BUILDING 200
 AUSTIN, TEXAS 78757 (512) 451-6334

WORK ORDER NUMBER 6126895
 SITE: CANTLEY'S EXXON

TANK INFORMATION:

Tank ID: 1	Tank manifolded: NO	Bottom to top fill in inches: 99.5
Product: PREMIUM	Vent manifolded: YES	Bottom to grade in inches: 104.0
Capacity in gallons: 4,000	Vapor recovery manifolded: YES	Fill pipe length in inches: 35.5
Diameter in inches: 64.00	Overfill protection: YES	Fill pipe diameter in inches: 4.0
Length in inches: 292	Overspill protection: YES	Stage I vapor recovery: DUAL
Material: STEEL W/CP	Installed: CP	Stage II vapor recovery: NONE
	CP installed on: / /	

COMMENTS

TANK TEST RESULTS Test Method: VacuTect:

	Start (in)	End (in)
Dipped Water Level:	1.87	1.87
Dipped Product Level:	22.50	22.50
Probe Water Level:	1.363	1.363
Ingress Detected: Water N	Bubble N	Ullage N
Test time:	10:16-13:11	
Inclinometer reading:	0.00	
VacuTect Test Type:	Single tank	
VacuTect Probe Entry Point:	Fill	
Pressure Set Point:	-2.00	
Tank water level in inches:	1.87	
Water table depth in inches:	103.00	
Determined by (method):	MONTR WELL	
Result:	PASS	

COMMENTS

THE LAST FUEL DROP WAS AT LEAST A COUPLE OF DAYS AGO. LINE WAS LAST USED YESTERDAY.

CANTLEY3 Supreme

This tank shows a very sudden loosing trend which you should investigate. It may be an anomalie but you should have your meters checked just to make sure.

ederal and State regulations mandate that you measure the product in your tanks each day that you are open -- even if you don't pump any product. Failure to measure the product in your tanks could result in a fine. Reporting a stick reading that you DID NOT ACTUALLY MEASURE is a felony in most states.

If you have a failure (a loss, a gain, or an inconclusive) you must report the failure to your local regulatory office within 24 hours of the time that you receive this report. Please read the "Investigative Protocol".

Keep these reports at your site so that you can show them to your regulatory agent if they drop by and want to see them. If I can be of any further assistance, please do not hesitate to call me.

Dr. Robert E. Mitchell
(830) 964-5855

Monthly
Statistical Inventory Reconciliation (SIR) Report
Mitchell's Sir Program

Facility	Name: Cantley Exxon Station Address: PO Box 62 City: Racine	State: WV	Phone: 304-837-8331 Zip: 25165
Owner	Name: Cantley Exxon Address: PO Box 62 City: Racine	State: WV	Phone: 304-837-8331 Zip: 25165
Sir Provider:	SIR International, Inc.		Phone: (830) 964-5855

Dear Mr. Cantley:

Enclosed is Order No. UST-13-034 dated June 11, 2013. This Order is issued to Lester Cantley by the director of the Division of Water and Waste Management under the authority of Chapter 22, Article 17, Section 15 of the Code of West Virginia. This Order contains notification of the right of appeal under the provisions of Chapter 22, Article 17, Section 18.

**ORDER
ISSUED UNDER THE
UNDERGROUND STORAGE TANK ACT
WEST VIRGINIA CODE, CHAPTER 22, ARTICLE 17**

TO: Lester Cantley Jr.
P.O. Box 62
Racine, WV 25165

DATE: June 11, 2013

ORDER NO.: UST-13-034

INTRODUCTION

The following findings are made and Order issued to Lester Cantley Jr. (hereinafter "Cantley") pursuant to the authority vested in the Director of the Division of Water and Waste Management under Chapter 22, Article 17, Section 1 et seq. of the Code of West Virginia.

FINDINGS OF FACT

In support of this Order, the Director hereby finds the following:

1. Cantley is the owner/operator of three (3) Underground Storage Tanks (USTs) located at Racine, Boone County, West Virginia. The facility operates under WV Identification No. 0-300297.
2. On June 5, 2009, West Virginia Department of Environmental Protection (WVDEP) personnel conducted an inspection of the facility. During the inspection, the following violation of the Code of Federal Regulations was observed and documented:
 - a. 40CFR280.31b - The owner/operator failed to perform a cathodic protection test of the UST system once every three (3) years.
3. On June 3, 2010, WVDEP received a corrosion protection report indicating that the UST system failed a cathodic protection test.
4. On June 30, 2010, WVDEP and Cantley entered into UST Consent Order No. UST-10-007. The Order required Cantley to pay a civil administrative penalty and submit a corrective action plan to bring the UST system into compliance or perform permanent proper closure of the UST system. Cantley paid the penalty but failed to submit a corrective action plan and failed to bring the facility into compliance.

5. On December 3, 2012, WVDEP personnel conducted an inspection of the facility. During the inspection, the following violations of the Code of Federal Regulations and WV Legislative Rules were observed and documented:
 - a. 40CFR280.70c - The owner/operator failed to remove USTs that had been Temporarily Out of Service (TOS) for more than twelve (12) months and did not meet the performance standard.
 - b. 40CFR280.93a - The owner/operator failed to maintain financial responsibility for the UST system.
 - c. 33CSR30 Section 7.2a - The owner/operator failed to perform operator training requirements.

As a result of these violations, Notice of Violation (NOV) Nos. 1211-2123, 1211-2124, and 1211-2125 were issued to Cantley.

6. On January 7, 2013, WVDEP personnel conducted a records review follow up inspection of the facility. During the inspection, the following violations of the Code of Federal Regulations were observed and documented:
 - a. 40CFR280.70a - The owner/operator failed to perform operation and maintenance of a cathodic protection system on a TOS UST.
 - b. 40CFR280.70c - The owner/operator failed to remove USTs that had been TOS for more than twelve (12) months and did not meet the performance standard.
 - c. 40CFR280.93a - The owner/operator failed to maintain financial responsibility for the UST system.

As a result of these violations, NOV No. 1301-0003 and Inspection of Violation (IOV) No. 1211-2123 and 1211-2124 were issued to Cantley.

7. On January 30, 2013, WVDEP received correspondence from Cantley in response to the January 7, 2013 inspection. Cantley indicated a lack of sufficient funds to remove the USTs.

ORDER FOR COMPLIANCE

And now, this day of June 11, 2013, Cantley is hereby ORDERED by the Director as follows:

1. Cantley shall immediately take measures to initiate compliance with all terms and conditions of this Order.
2. Within twenty (20) days of the effective date of this Order, Cantley shall submit for approval a proposed plan of corrective action and schedule, outlining action items and completion dates for how and when Cantley will achieve compliance with all pertinent laws and rules. This plan shall include, but not be limited to, provisions for permanent closure of the above referenced UST systems in accordance with 40 CFR Subpart G. The plan of corrective action shall make reference to WV Identification No. 0-300297 and Order No. UST-13-034. The plan of corrective action shall be submitted to:

**Program Manager, WVDEP/UST
Environmental Enforcement - Mail Code #031327
601 57th Street SE
Charleston, WV 25304**

A copy of this plan shall be submitted to:

**Chief Inspector
Environmental Enforcement - Mail Code #031328
WVDEP
601 57th Street SE
Charleston, WV 25304**

3. Within twenty (20) days of the effective date of this Order, Cantley shall pay 2013 UST registration fees in the amount of \$285 (invoice attached).

OTHER PROVISIONS

1. Compliance with the terms and conditions of this Order shall not in any way be construed as relieving Cantley of the obligation to comply with any applicable law, permit, other order, or any other requirement otherwise applicable. Violations of the terms and conditions of this Order may subject Cantley to additional enforcement action in accordance with the applicable law.
2. The provisions of this Order are severable and should a court or board of competent jurisdiction declare any provisions to be invalid or unenforceable, all other provisions shall remain in full force and effect.
3. This Order is binding on Cantley, its successors and assigns.
4. This Order shall terminate upon Cantley's notification of full compliance with the "Order for Compliance" and verification of this notification by WVDEP.

RIGHT OF APPEAL

Notice is hereby given of your right to appeal the terms and conditions of this Order which you are aggrieved to the Environmental Quality Board by filing a NOTICE of APPEAL on the form prescribed by such Board, in accordance with the provisions of Chapter 22, Article 17, Section 18 of the Code of West Virginia within thirty (30) days after receipt of this Order.

This Order shall become effective upon receipt.

Annual UST registration fees are issued pursuant to the WV Underground Storage Tank Act (22-17). 2004 fees are \$60 for each petroleum and \$65 for each hazardous substance UST. Misc. fees indicate past due fees or credits: 1988 was \$20.41/tank; 1989 was \$31.00/tank; 1990, 1991 and 1992 was \$45.00/tank; 1993, 1994 and 1995 was \$50.00/tank; 1996 and 1997 was \$25.00/tank; 1998, 1999, 2000, 2001, 2002 and 2003 was \$50.00/tank. After 30 days a 50% late fee applies.

Tank ID	Capacity in Gal.	Product	Fee Year	Transaction Description	Amount
T3	6000	Gasoline	298840 2013	UST Base Fee	\$90.00
T3			298840 2013	Groundwater Fee	\$5.00
T2	6000	Gasoline	298840 2013	UST Base Fee	\$90.00
T2			298840 2013	Groundwater Fee	\$5.00
T1			298840 2013	Groundwater Fee	\$5.00
T1	4000	Gasoline	298840 2013	UST Base Fee	\$90.00

PLEASE PAY THIS AMOUNT >>>>

\$285.00

Important Operator training requirements take effect August 8, 2012 and applies to ALL tank owners and operators even at sites where the tanks are not in use.

When you provide a check as payment, you authorize us either to use information from your check to make a one-time electronic fund transfer from your account or to process the payment as an image transaction. For inquiries, please call 1-888-243-9010.

When we use information from your check to make an electronic fund transfer. Funds may be withdrawn from your account as soon as the same day you make your payment, and you will not receive your check back from your financial institution.

Dear Mr. Cantley,

You were issued Order No. UST-13-034 which became effective June 13, 2013. This Order requires the remittance of outstanding Underground Storage Tank (UST) registration fees in the amount of \$285.00. Currently, the outstanding UST registration fees have not been received and are now past due. Please remit the past due balance of \$285.00 within ten (10) days of receipt of this correspondence. Failure to comply with this request may result in alternative collection and enforcement actions. Payment shall be sent to:

**Chief Inspector
West Virginia Department of Environmental Protection
Environmental Enforcement
601 57th Street, SE
Charleston, WV 25304**

Sincerely,

Jeremy W. Bandy
Assistant Chief Inspector

Re: Order No. UST-13-034
WV ID #: 0-300297

Dear Mr. Cantley,

91 7199 9991 7032 6246 5456

You were issued Order No. UST-13-034 which became effective June 13, 2013. This Order requires the remittance of outstanding Underground Storage Tank (UST) registration fees in the amount of \$285.00. Currently, the outstanding UST registration fees have not been received and are now past due. Please remit the past due balance of \$285.00 within ten (10) days of receipt of this correspondence. Failure to comply with this request may result in alternative collection and enforcement actions. Payment shall be sent to:

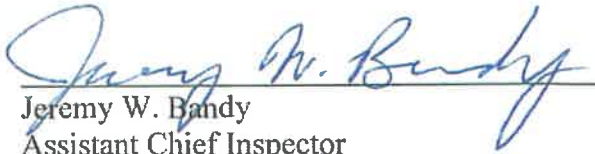

Chief Inspector
West Virginia Department of Environmental Protection
Environmental Enforcement
601 57th Street, SE
Charleston, WV 25304

In regards to your letter (attached) to the West Virginia Department of Environmental Protection (WVDEP) received on July 10, 2013 concerning UST Order UST-13-034. The Order does not require the immediate removal of the underground storage tanks (USTs) but requires you to submit a Plan of Corrective Action (POCA) for how and when you will permanently properly close the USTs at the site. I encourage you to submit for approval a plan with a reasonable schedule for UST removal at your facility.

WVDEP is in receipt of the cathodic protection (CP) test and Class C operator training certificate for the facility. WVDEP appreciates your submittal of this information. Upon review of this submittal, it was noted that the CP test documents that the supreme unleaded UST failed the test and the UST does not meet performance standards. Furthermore, as the tank owner/operator you are required to complete Class A/B Operator training for your facility. Class C operator training was not required because the status of the USTs at the site is "temporarily out of service."

Within thirty (30) days submit a POCA with a realistic schedule for permanent closure of the USTs at your facility. If you need assistance or have any questions regarding the POCA, please contact Ruth Porter at 304-926-0499, extension 1007.

Sincerely,

Jeremy W. Bandy
Assistant Chief Inspector

I Am writing This letter for
Approval of a plan to get the
TANKS out of the ground After this
Judgement is paid for, I was saving the
money to have them took out In
2010 When the Judge took what money
I had save, for this she took what
money I had In the Bank, I can put
the money In an account In the DEP
Name to show you that I am gone to
get the tanks took out. I got 2 1/2
more years to pay for the judgement
AN IT will Be paid for If I dont
PAY this Every month I go to Jail.
I do NOT HAVE the money to
get TANKS out of the ground AS
of Now IF I HAVE ANY MONEY TO
the judgement I could HAVE ALREADY had
the tanks out when we said that we was
gone to in 2010. My family Does with
out of things Every Day that they need
so my money I get Every month is taken
can not Do any thing Right Now.

RECEIVED

CATHODIC PROTECTION — GALVANIC

WEST VIRGINIA UNDERGROUND STORAGE TANKS

WV Department of Environmental Protection
Division of Water and Waste Management
Environmental Enforcement/ UST Unit
<http://www.dep.wv.gov/NWE/ep/ust/Pages/default.aspx>

601 57th Street, S.E.
Charleston, WV 25304
Phone (304) 926-0470
Fax (304) 926-0457

is utilized to evaluate underground storage tank (UST) galvanic cathodic protection (CP) systems in the State of West Virginia.

- > A copy of this completed form must be submitted by the owner/operator to the WVDEP UST Section within 30 days of testing.
- > A site drawing depicting the UST cathodic protection system and all reference electrode placements must be completed.

I. UST OWNER: LESTER CANTLEY		II. UST FACILITY	
Contact Name: LESTER CANTLEY	Phone: 304-837-3700	Name: CANTLEY EXXON	Facility ID: 0-300297
Address: 3167 SHORT CREEK RD.		Address: 3167 SHORT CREEK RD.	
City: RACINE	State: WV 25163	City: RACINE WV 25163	County:

III. REASON SURVEY WAS CONDUCTED (mark only one)

Routine - 3 year Routine - within 6 months of installation/upgrade/modification

Re-survey upon achievement of steady-state polarization immediately following upgrade/modification (complete Section IX)

IV. CATHODIC PROTECTION TESTER'S EVALUATION (mark only one)

PASS All protected structures at this facility pass the cathodic protection and continuity survey (indicate all criteria applicable by completion of Section V). No further action is necessary at this time. Next test is due in 3 years.

FAIL One or more protected structures at this facility fail the cathodic protection and/or continuity survey. Refer to a corrosion expert for further evaluation OR permanently close.

INCONCLUSIVE If the remote and the local do not both indicate the same test result on all protected structures (both pass or both fail), inconclusive is indicated and/or if the continuity survey indicates inconclusive or continuous results, a corrosion expert must evaluate the survey and complete Section VI.

Tester Name: PHILLIP STONE	WVDEP Certification Number: #DE 491
Company Name: SUPERIOR SERVICES	Certifying Organization & Number (e.g., NACE): NACE # 8021
Address: PO BOX 982	Certification Type (e.g., CP Tester, CP Technician): CORROSION TECHNOLOGIST
City: HENDERSONVILLE	State: NC
Zip: 28793	Phone: 828-698-6298

CP Tester's Signature: *Phillip Stone* Date Signed: **1/8/16** Date CP Survey Performed: **1/8/16**

V. CRITERIA APPLICABLE TO TESTER'S EVALUATION (mark all that apply)

850 mV ON Structure-to-soil potential more negative than -850 mV with respect to a Cu/CuSO₄ reference electrode with protective current applied (This criterion is applicable to any galvanic protected structure).

850 mV Instant OFF Structure-to-soil potential more negative than -850 mV with respect to a Cu/CuSO₄ reference electrode with protective current temporarily interrupted (This criterion is applicable only to those galvanic systems where the anodes can be disconnected).

100 mV Polarization Structure tested exhibits at least 100 mV of cathodic polarization. (This criterion is applicable only to those galvanic systems where the anodes can be disconnected).

VI. CORROSION EXPERT'S EVALUATION IF REQUIRED (mark only one)

The survey must be conducted and/or evaluated by a corrosion expert when: a) an inconclusive is indicated for any protected structure since both the local and the remote structure-to-soil potentials do not result in the same outcome; b) upgrades to steel piping protected by galvanic systems are conducted; c) supplemental anodes are added to the tanks and/or piping without following an accepted industry code; or d) when required by WVDEP.

PASS All protected structures at this facility are judged to have adequate cathodic protection and therefore pass the CP and continuity survey. Indicate all criteria applicable: -850 mV ON -850 mV Instant OFF 100 mV Polarization

FAIL One or more tested structures at this facility do not pass the CP and/or continuity survey and it is judged that adequate CP is not currently being provided to the UST system (indicate what action is necessary by completion of Section VII).

Corrosion Expert's Name:	WVDEP Class D Cert. #:	NACE Int'l Cert. Type/ Professional Engineer (PE) Specialty:	
Company Name:	NACE Int'l Cert. Number or RPE Number/ State:		
Address:	City:	State:	Zip:
Corrosion Expert's Signature:			Phone:
Corrosion Expert's Signature:			Date:

VII. ACTION REQUIRED AS A RESULT OF EXPERT'S EVALUATION (mark only one)

NONE Cathodic protection (CP) is adequate. No further action is necessary at this time.

UPGRADE & RETEST Cathodic protection is not adequate. Immediately upgrade per industry standard or corrosion expert design OR permanently close. If upgraded, system must be retested within 6 months after the upgrade.

Next cathodic protection survey due _____ (required every 3 years and within 6 months of upgrades)

CATHODIC PROTECTION — GALVANIC

VIII. DESCRIPTION OF UST SYSTEM

TANK #	PRODUCT STORED (PREMIUM, DIESEL, ETC.)	TANK CAPACITY (GAL)	CONSTRUCTION MATERIAL			FLEX CONNECTORS (Bonded, Isolated, booted, anode, N/A)
			TANKS	PIPING	SIPHON LINE	
1	REGULAR	6,000	STI-P3	STEEL		anode
2	PLUS	6,000	STI-P3	STEEL		anode
3	SUPER	4,000	STI-P3	STEEL		anode

17						
18						
19						
20						

IX. DESCRIPTION OF CATHODIC PROTECTION SYSTEM UPGRADES AND/OR MODIFICATIONS

Cathodic protection systems must be evaluated within 6 months after any upgrades and/or modifications. Complete this section if any upgrades or modifications were made to the cathodic protection system in response to a "failed" evaluation. Certain upgrades/modifications as determined by WWDEP are required to be designed and/or evaluated by a corrosion expert (completion of Section VI required).

- Supplemental anodes for a StI-P3 tank were added (attach corrosion expert's design or document industry standard used).
- Supplemental anodes for metallic pipe or flex-connectors were added (attach corrosion expert's design or document industry standard used).
- Galvanically protected tanks/piping not electrically isolated (explain upgrades/modifications completed in "Remarks/Other" below).

Remarks/Other: TANKS ARE STI-P3. THE SUPER TANK WILL NOT MEET CRITERIA. PIPING IS STEEL. IT HAS BEEN PROTECTED WITH SACRIFICIAL ANODES. THERE IS NO DIELECTRIC UNIONS BETWEEN THE PIPING AND THE SUCTION PUMPS, BUT THE PIPING WILL STILL MEET CRITERIA. THERE IS THREE LOCATIONS WHERE THE STEEL PIPING IS STUBBED UP BUT THERE IS NO SUCTION PUMPS.

CATHODIC PROTECTION — GALVANIC

3 of 8

X. UST FACILITY SITE DRAWING

Attach detailed drawing of the UST and cathodic protection systems. Sufficient detail must be given in order to clearly indicate where the reference electrode was placed for each structure-to-soil potential that is recorded on the survey forms. Any pertinent data must also be included. At a minimum you should indicate the following: All tanks, piping and dispensers; All buildings and streets; All anodes and wires; Location of CP test stations; Each reference electrode placement must be indicated by a code (e.g., 1,2,3... T-1, T-2, P-1, P-2... etc.), corresponding with the appropriate line number in Section XII of this form.

AN EVALUATION OF THE CATHODIC PROTECTION SYSTEM IS NOT COMPLETE WITHOUT AN ACCEPTABLE SITE DRAWING.

- PRODUCT FILL
- JUNCTION OF ANODES AND TANK WIRES

CATHODIC PROTECTION — GALVANIC

XI. GALVANIC (SACRIFICIAL ANODE) CATHODIC PROTECTION SYSTEM CONTINUITY SURVEY

- This section may be utilized to document measurements of continuity on underground storage tank systems that are protected by CP systems.
- When conducting a fixed cell – moving ground survey, the reference electrode must be placed in the soil at a remote location and left undisturbed.
- Conduct point-to-point test between any two structures for which the fixed cell-moving ground survey is inconclusive or indicates possible continuity.
- For galvanic systems, the structure that is to be protected must be isolated from any other metallic structure in order to pass the continuity survey.

FACILITY NAME:

CANTLEY EXXON

NOTE: The survey is not complete unless all other applicable parts of this form are also completed

DESCRIBE LOCATION OF "FIXED REMOTE" REFERENCE ELECTRODE PLACEMENT:

STRUCTURE "A" :	STRUCTURE "B" :	STRUCTURE "A" : FIXED REMOTE VOLTAGE	STRUCTURE "B" : FIXED REMOTE VOLTAGE	POINT-TO-POINT VOLTAGE DIFFERENCE	ISOLATED / CONTINUOUS/ INCONCLUSIVE
(example) PREMIUM TANK BOTTOM	(example) PREMIUM TANK FILL RISER	(example) -921 mV	(example) -915 mV		(example) INCONCLUSIVE
(example) PREMIUM TANK BOTTOM	(example) PREMIUM TANK FILL RISER			(example) 17 mV	(example) ISOLATED
REG TANK TEST LEAD	REG FILL	-1290	-411		ISOLATED
PLUS TANK BTM	PLUS FILL	-1253	-709		ISOLATED
SUPER TANK BTM	SUPER FILL	-519	-584		ISOLATED
REG SUC PUMP FRAME	REG SUC PIPE	-1194	-1194		CONTINUOUS
PLUS SUC PUMP FRAME	PLUS SUC PIPE	-1194	-1194		CONTINUOUS
SUPER SUC PUMP FRAME	SUPER SUC PIPE	-1194	-1194		CONTINUOUS

COMMENTS: TANKS HAVE DIELECTRICALLY ISOLATED RISERS. THERE IS NO DIELECTRICS AT THE SUCTION PUMPS.

- 1) Describe the cathodically protected structure ("A") that you are trying to show is isolated from unprotected structures (e.g., premium tank).
- 2) Describe the unprotected structure ("B") that you are attempting to demonstrate is isolated from the protected structure (e.g., Premium tank fill riser).
- 3) Record the measured structure-to-soil potential of the protected structure ("A") in millivolts (e.g., -921 mV).
- 4) Record the measured structure-to-soil potential of the unprotected structure ("B") in millivolts (e.g., -915 mV).
- 5) Record the voltage observed between structure "A" and structure "B" when conducting "point-to-point" testing (e.g., 17 mV).
- 6) Document whether the test indicated the protected structure was isolated, continuous or inconclusive, according to the chart below.

Isolated	Continuous	Inconclusive
Voltage difference is >10 mV	Voltage difference is ≤1 mV	Voltage difference is > 1 mV but ≤10 mV

CATHODIC PROTECTION — GALVANIC

Pg. 5 of 5

XII. CATHODIC PROTECTION SYSTEM SURVEY

- ▶ This section must be used to document a survey of a galvanic system by obtaining structure-to-soil potential measurements.
- ▶ At a minimum the reference electrode must be placed in the soil at both ends and the middle centerline of each tank and both ends of each piping run.
- ▶ STIP3 tank alternative: In lieu of the above method, a reading may be taken over the center of the tank midline and 1 remote reading at least 30' away from the structure being tested.
- ▶ Both the local and the remote voltage must be -850 mV or more negative to pass.
- ▶ Inconclusive is indicated when both the local & remote structure-to-soil potentials do not result in the same outcome (Both must pass or both fail)
- ▶ If the 100 mV polarization method is used to verify adequate CP on a system for which anodes can be disconnected, please use page 5 of the CATHODIC PROTECTION IMPRESSED CURRENT form.

FACILITY NAME: **CANT;EY EXXON** NOTE: The survey is not complete unless all other applicable parts of this form are also

DESCRIBE LOCATION OF REMOTE REFERENCE ELECTRODE PLACEMENT: **40' FROM TANK FIELD IN SOIL**

	PLUS SUC PIPE	PIPE @ PUMP	SOIL AT SUCTION PUMP	-1275	-1194	PASS
	SUP SUC PIPE	PIPE @ PUMP	SOIL AT SUCTION PUMP	-1256	-1194	PASS

COMMENTS: THE SUPER TANK WILL NOT MEET CRITERIA.

- 1) Designate numerically or by code on the site drawing each "local" reference electrode placement (e.g., 1,2,3... T-1, T-2, P-1, P-2...etc.).
- 2) Describe the structure that is being tested (e.g., plus tank; premium piping; diesel submersible pump flex connector; etc.).
- 3) Describe where contact with the structure being tested is made (e.g., T1 test lead, plus tank bottom; diesel piping @ dispenser 7/B; PP4, etc.).
- 4) Describe the exact location where reference electrode is placed for each measurement (e.g., soil @ regular tank STP manway; soil @ dispenser 2, etc.).
- 5) Record the structure-to-soil potential measured with the reference electrode placed "local" in millivolts (e.g., -885 mV, -920 mV, etc.).
- 6) Record the structure-to-soil potential measured with the reference electrode placed "remote" (copy voltage that was obtained during continuity survey).
- 7) Indicate if the tested structure passed or failed the -850 mV "on" criterion based on your interpretation of data.

CERTIFIED RETURN RECEIPT REQUESTED

91 7199 9991 7035 6612 4417

Dear Mr. Cantley:

Enclosed is the report for the Compliance Monitoring Inspection (CMI) conducted at Cantley Bros. Exxon, (WV ID# 0-300297) on 1/13/2016. One or more significant deficiencies were noted during the inspection; therefore, you will find one or more Notices of Violation (NOV) enclosed with this correspondence. Your immediate attention should be given to the deficiencies noted in the enclosed documents and the attached Notice(s) of Violation (NOV). Be guided by the attached Notice of Violation(s) as how to advise the West Virginia Department of Environmental Protection (WVDEP) as to your plan to bring your facility back into compliance.

Failure to take corrective action to eliminate deficiencies may result in enforcement action as outlined in Chapter 22, Article 12, Chapter 22, Article 17, and/or Chapter 30, Article 12 of the West Virginia Code.

Be advised that failure to comply with an Order of the Director can result in a civil penalty of not more than \$25,000 for each day of non-compliance pursuant to WV Code 22-17-16a.

If you have any questions, please contact AST/UST inspector, Niki Davis at 304-926-0499, ext. 1834.

Sincerely,

Ruth M. Porter
AST/UST Program Manager

Information received from an inspection conducted on or about the 13 day of January, 2016, on the above facility has revealed that the owner and/or operator of the underground storage tank (UST) system(s) is in violation of the provisions of Chapter 22, Article 17, Section 6 of the Code of West Virginia and/or Section(s):

40CFR 280.70(c) of the Rules and Regulations in that the owner/operator failed to permanently close a temporarily closed tank system that does not meet performance standards after 12 months.

Therefore, pursuant to the authority contained in Chapter 22, Article 17, of the Code of West Virginia, the owner/operator is hereby notified that the owner/operator is in VIOLATION of the provisions of the Code of West Virginia as described above. In order to correct the violations cited above, the following corrective measures are necessary:

Comply with the above cited rule.

Issuer Contact Information: niki.n.davis@wv.gov, 601 57th Street, Charleston, WV 25304; phone 304-926-0499, ext. 1834; fax 304-926-0457

Referred for enforcement

NOTICE

The issuance of this Notice may result in further enforcement action(s) in accordance with West Virginia Code §22-17. **Within thirty (30)** days receipt of this Notice, submit your written response including actions taken to correct to the address listed above. Please contact the inspector if you have any questions regarding this Notice.

OPERATOR TRAINING GUIDANCE DOCUMENT

Beginning August 8, 2012, all individuals who operate, maintain, or are responsible for addressing emergencies presented by spills or releases from Underground Storage Tanks (USTs) must receive training based on their duties and level of responsibility for USTs, in accordance with Article 33 Section 30.7 of the West Virginia Legislative Rules. This guidance is provided to assist UST owners/operators in complying with the new requirements.

Three levels of responsibility have been established for individuals:

1. **Class A Operator** – responsibilities include managing resources and personnel, such as establishing work assignments, to achieve and maintain regulatory compliance
 - a. This individual focuses on the broader aspects of the regulatory requirements and standards necessary to operate and maintain the UST system.
 - b. This class of operator ensures that appropriate individuals: operate and maintain the UST system, maintain records, are trained in these activities, are properly trained to respond to emergencies caused by spills or releases from the USTs, and make financial responsibility records available to the West Virginia Department of Environmental Protection (WVDEP).
 - c. The Class A Operator role is fulfilled by the owner/operator and not contracted out.
2. **Class B Operator** – implements day-to-day aspects of operating, maintaining, and recordkeeping for USTs
 - a. This individual must have a more in-depth understanding of operation and maintenance of the UST system than the Class A Operator.
 - b. This individual ensures: release detection, recordkeeping, and reporting requirements are met; all relevant equipment complies with performance standards; and appropriate individuals are trained to properly respond to emergencies caused by releases or spills from the UST system.
 - c. WVDEP will give consideration to allowing the Class B Operator role to be fulfilled by a contracted individual when formally requested and approved by WVDEP.
 - d. Since the Class B Operator implements day-to-day operation and maintenance of the UST system, it is expected that this individual will periodically inspect the UST system to ensure compliance. Owners/operators should develop an Operation and Maintenance plan and schedule outlining how the requirements noted in item b above will be addressed. The schedule should provide the

frequency for the Class B Operator to perform inspections of the UST system. One suggested option for an O&M plan is Petroleum Equipment Institute's (PEI) Recommended Practice RP900-08, Recommended Practices for Inspection and Maintenance of UST systems. It is available at <http://www.pei.org/Default.aspx?TabId=107>. The recommended practice includes sample charts for documenting UST system inspections at daily, monthly, and annual intervals. If WVDEP observes that there are numerous violations by an owner/operator, the agency will discuss the possible need for changes to the O&M plan and schedule with the owner/operator.

3. **Class C Operator** – controls or monitors the dispensing of regulated substances and is responsible for initial response to alarms or releases
 - a. This individual is responsible for responding to alarms and other indications of emergencies caused by spills or releases from USTs.
 - b. This individual notifies the Class B or Class A Operator and appropriate emergency responders when necessary.
 - c. A **Class C Operator must be onsite during all hours of operation**. WVDEP will consider written requests from owners for designating certain types of facilities as unmanned facilities on a case by case basis. Criteria will be developed for determining if facilities qualify for this designation. For unmanned facilities, information must be provided to WVDEP regarding how the Class C Operator(s) will be notified and respond to emergencies. The information must include procedures for how the Class C Operator will be made aware of emergencies. Unmanned facilities will be required to have at least one Class C Operator available at all times to respond immediately to calls from the facility and who is capable of reaching the site within 60 minutes.

An individual, where appropriate and with the required training, may fulfill the role of multiple levels of operator.

Training Requirements for Operators

Class A Operator minimum training requirements:

- 1) General knowledge of UST system requirements to make informed decisions regarding compliance and ensure appropriate individuals are fulfilling operation, maintenance, and recordkeeping requirements and requirements of federal and state programs regarding: spill prevention, overfill prevention, release detection, corrosion protection, emergency response, and product compatibility
- 2) Financial responsibility documentation requirements
- 3) Notification requirements
- 4) Release and suspected release reporting
- 5) Temporary and permanent closure requirements
- 6) Operator training requirements
- 7) Requirements for UST work performed by West Virginia Certified Workers
- 8) Training must take place within 30 days after assuming operation and maintenance responsibilities for UST systems.

Class B Operator training encompasses at a minimum:

- 1) Components of UST systems
- 2) Materials of UST system components

- 3) Methods of release detection and release prevention applied to UST components
- 4) Operation and maintenance requirements of the state and federal regulations that apply to UST systems including: spill prevention, overfill prevention, release detection, corrosion protection, emergency response, and product compatibility
- 5) Reporting and recordkeeping requirements
- 6) Class C operator training requirements
- 7) Training must take place within 30 days after assuming operation and maintenance responsibilities for UST systems.

Class C Operator training:

- 1) Response to emergencies such as situations posing an immediate danger or threat to the public or the environment and that require immediate action
- 2) Response to alarms caused by spills or releases from a UST system or failed release detection results
- 3) Training must take place before assuming responsibility for responding to emergencies

Note: Training must take place by August 8, 2012 as noted above. Following the initial training, if WVDEP determines that an UST system does not meet significant operational compliance requirements, the appropriate operator(s) must be retrained. WVDEP reserves the right to determine whether Class A, Class B, or both classes of operator require retraining based on the compliance issues observed. Retraining must take place within 30 days of the determination that retraining is required and a copy of the training certificate submitted to WVDEP. Compliance issues with USTs systems under the same operator(s) noted within six months of retraining will be reviewed by the Program Manager to determine if additional retraining is necessary again.

Each UST system must have designated operators for each class at all times. Owners are required to maintain a list of each certified operator and the individual's area of responsibility and make it available to WVDEP upon request. Operator names and records of training for each UST system operator must be available. Each Class A and Class B Operator must carry proof of training during duty hours, and each Class C Operator must have proof of training present at the location where the Class C Operator is on duty. The certified operator must have personal photo identification available that will enable WVDEP to verify that certified operator's identity.

Approval of Required Training

All training programs used to meet the Operator Training requirements must have prior written approval by WVDEP. Upon approval, the training may be conducted multiple times at multiple locations. The approved training can include in class, on line, or hands-on training.

Requirements:

- 1) Applications for training approval shall be submitted by the training provider to WVDEP in writing, using the prescribed form.
- 2) Applications must be accompanied by a nonrefundable application fee of \$280.00 by check or money order made payable to West Virginia Department of Environmental Protection.
- 3) Applications for approval of specific training programs shall contain: a complete course outline; training material; sample certificates; the methodology for verifying attendance; the date, time, and location of the course; the name of the offering organization; the

credentials of the instructors; and a certification that the technology or methods that will be presented in the training program will satisfy state and federal laws.

- 4) The approved training must include a test designed to measure all aspects of the individual's knowledge and skills to competently operate UST systems.**
- 5) The training provider must supply the individual with a certificate of training documenting the level of training received. Upon request, the training provider must submit individual test results and documents verifying training attendance to WVDEP.**
- 6) Each individual operator shall demonstrate that they have received the required training by providing a copy of the training certificate to WVDEP upon request.**
- 7) Training providers will be required to apply for any modifications to the training program and receive approval from WVDEP prior to implementing them. All training must demonstrate that it remains up to date with new developments related to operating and maintaining UST systems. To ensure this, WVDEP will require that training providers update their training application with the agency at a minimum interval of every five years. Training programs will be issued an expiration date; the provider must have reapplied by that date or the program will no longer have approval. Resapplication will be subject to the fee established in 33-30-7.3.a.2 of the Legislative Rules.**
- 8) If numerous operators trained under an approved program show consistent inability to maintain compliance for the USTs they operate, training program approval may be revoked after the reasons for the revocation are set forth in writing to the training provider by the agency.**

CERTIFIED RETURN RECEIPT REQUESTED

91 7199 9991 7035 6612 5643

Re: Plan of Corrective Action
Order No. UST-13-034

Dear Mr Cantley:

West Virginia Department of Environmental Protection (WVDEP) has received your Plan of Corrective Action, dated January 30, 2016, as required by Item No. UST-13-034 under the Order for Compliance section of Order No. UST-13-034.

WVDEP has determined that the proposed Plan of Corrective Action is not acceptable and has not been approved because of the deficiencies noted below:

It does not meet the requirements outlined in your order such as action items and completion dates for bringing the facility into compliance.

Within 20 days of receipt of this correspondence, Lester Cantley shall submit a revised Plan of Corrective Action that addresses the aforementioned deficiencies. Failure to submit an approvable Plan of Corrective Action is a violation of the Order. The plan of corrective action shall be submitted to:

**Chief Inspector
Environmental Enforcement - Mail Code #031328
WVDEP
601 57th Street SE
Charleston, WV 25304**

Should you have any questions regarding this matter, please contact me at (304) 926-0470.

Sincerely,

Jeremy W. Bandy
Chief Inspector

RELEASE INFORMATION:

Was the release: Gasoline Diesel Other (specify) _____
 Source: Tank Piping Dispenser Submersible Turbine Pump Delivery Problem Other (specify) _____
 Cause Information: Spill Overfill Corrosion Physical or mechanical damage Install problem
 Other (specify) _____

ADDITIONAL LEAK/COMPLAINT INFORMATION: Barnett Builders began closure activities on 3/16/16 and will resume on 3/17 & 3/18. There are 3 gasoline USTs (2 - 6,000-gallon and 1 - 4,000 gallon) at the site. While uncovering the first 6,000-gallon tank, a gasoline odor was detected in the soil near the bottom of this UST. A PID reading of the soil was measured at 1,836 ppm. Groundwater has not been observed and water was not detected in any of the 4 observation wells within the UST pit. There is limited space onsite, but contractor will attempt to remove and stockpile some impacted soil. *Note: this site is associated with Leak ID 03-066.

ACTION TAKEN: Forwarded Erin Brittain, OER Program Manager; Jessica Henson, OER Administrative Secretary; Ruth Porter, UST Program Manager; File Copy; Jason Liddle, UST Inspector Supervisor; Niki Davis, UST Inspector; Andrew Stout, OER Project Manager; Melissa McCune, OER Program Manager.

Leaking Underground Storage Tank CONFIRMED RELEASE NOTICE TO COMPLY

A release has occurred from a regulated underground storage tank system at the facility referenced below.

Facility	LEAK # 16-014	WV ID # 0300297	CLOSURE # UC-8180-2016	
	NAME Former Cantly Bros. Exxon		PHONE	
	ADDRESS Rt 94	CITY Racine	ZIP 25165	COUNTY Boone
Owner	NAME Lester Cantley	CONTACT PERSON Lester Cantley	PHONE 304-837-3700	
	ADDRESS PO Box 62	CITY Racine	STATE WV	ZIP 25165
Operator	<input type="checkbox"/> Owner <input type="checkbox"/> Other: NAME		PHONE	
	ADDRESS	CITY	STATE	ZIP

Required Initial Response

The tank owner/operator must perform the following initial response actions within 24 hours of a release:

1. Remove as much of the regulated substance from the UST system as is necessary to prevent further release to the environment.
2. Check adjacent structures to identify fire, explosion, and vapor hazards.
3. Investigate to determine the possible presence of free product at existing monitoring points and report the results to WVDEP.
4. If free product is present, control the spread of the contamination.
5. Comply with all other provisions of the initial abatement measures and site check.

Reports Due

The tank owner/operator must submit the following reports to WVDEP within the specified timeframes:

<input type="checkbox"/> Initial Abatement Measures and Site Check Report (40CFR280.62)	
<input checked="" type="checkbox"/> UST Closure Report	6/18/2016
<input checked="" type="checkbox"/> Initial Site Characterization (40CFR280.63)	7/3/2016
<input type="checkbox"/> Free Product Recovery Report (40CFR280.64)	
<input type="checkbox"/> Site Investigation Report (40CFR280.65)	
<input type="checkbox"/> 1. There is evidence that groundwater wells have been affected by the release. <input type="checkbox"/> 2. Free product has been found and needs to be recovered. <input type="checkbox"/> 3. There is evidence that contaminated soils may be in contact with groundwater. <input type="checkbox"/> 4. The implementing agency requests an investigation, based on the potential effects of contaminated soil or groundwater on nearby surface water and groundwater resources.	
<input type="checkbox"/> Corrective Action Plan (40CFR280.66)	
<input type="checkbox"/> Other:	

Report Submittals

All reports/correspondence must reference the Leak ID and WV ID and be mailed and e-mailed to the following locations:

TYPE OF NOTIFICATION
NEW AMENDED CLOSURE CHANGE OF OWNER
Tanks # additional 3 # Tanks
at facility sheets attached closed

INSTRUCTIONS AND GENERAL INFORMATION

Please type or print in ink. Also, be sure you have signatures in ink for sections VIII and XI. Complete a notification form for each location containing underground storage tanks. If more than 6 tanks are present at this location, photocopy pages 2 through 4 and use them for additional tanks.

The primary purpose of this notification program is to locate and evaluate underground storage tank systems (USTs) that store or have stored petroleum or hazardous substances. The information you provide will be based on reasonably available records, or in the absence of such records, your knowledge and recollection.

State law (West Virginia Underground Storage Tank Act, Chapter 22 Article 17) requires UST owners to use this notification form for all USTs storing regulated substances that are brought into use after May 1, 1990, (May 8, 1986, by Federal law) or USTs in the ground as of May 1, 1990, (May 8, 1986 by Federal law) that stored regulated substances at any time.

Who Must Notify? The UST Act requires owners of USTs that store regulated substances (unless exempted) to notify the WV Department of Environmental Protection of the existence of their USTs. "Owner" is defined as:

- any person who owns an UST that was in use on November 8, 1984 or after used for storage, use or dispensing of regulated substances
- any person who owned the UST immediately before the discontinuation of its use if last used before November 8, 1984.

Also, any facility that has made any changes to facility information or UST system status must submit a notification form.

Where to Notify? Send completed forms to the address above.

What USTs Are Included? An UST system is defined as any one or combination of tanks that (1) is used to contain an accumulation of regulated substances, and (2) whose volume (including connected underground piping) is 10% or more below the ground. Regulated USTs store petroleum or hazardous substances, (see the following "What Substances Are Covered").

Penalties: Any owner who knowingly fails to register or submits false information shall be subject to a civil penalty not to exceed \$10,000 for each tank that is not registered or for which false information is submitted.

What Tanks Are Excluded From Notification?

- Tanks removed from the ground on or before May 8, 1986;
-Farm or residential tanks of 1,100 gallons or less capacity storing motor fuel for noncommercial purposes;
-Tanks storing heating oil for use on the premises where stored;
-Septic tanks;
-Pipeline facilities (including gathering lines) regulated under the Natural Gas Pipeline Safety Act of 1968, or the Hazardous Liquid Pipeline Safety Act of 1979, or which is an intrastate pipeline facility regulated under State laws;
-Surface impoundments, pits, ponds, or lagoons;
-Storm water or waste water collection systems;
-Flow-through process tanks;
-Liquid traps or associated gathering lines directly related to oil or gas production and gathering operations;
-Tanks on or above the floor of underground areas, such as basements or tunnels;
-Tanks with a capacity of 110 gallons or less.

What Substances Are Covered? The notification requirements apply to USTs containing petroleum or certain hazardous substances. Petroleum includes gasoline, used oil, diesel fuel, crude oil or any fraction thereof which is liquid at standard conditions of temperature and pressure (60°F and 14.7 pounds per square inch absolute). Hazardous substances are those found in Section 101 (14) of the Comprehensive Environmental Response, Compensation and Liability Act of 1980 (CERCLA), with the exception of those substances regulated as hazardous waste under Subtitle C of RCRA.

When to Notify? 1. Owners of USTs in use or that have been taken out of operation, but are still in the ground must notify by May 1, 1990 (May 8, 1986, by Federal law). 2. After May 1, 1990, (May 8, 1986, by Federal law) owners must notify within 30 days of acquiring the UST(s). 3. Prior to receiving fuel deliveries at a facility the owner must notify/register UST(s) and pay required fees. 4. Notification of any amendments to the facility must be filed by December 31 of that year. 5. Upon change of ownership.

I. OWNERSHIP OF UST(S)

XI. CERTIFICATION OF INSTALLATION (COMPLETE FOR UST SYSTEMS INSTALLED AFTER 12/22/1988)

Installer check all that apply:

Installer is certified by tank & piping manufacturer	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
Installer certified by the WVDEP	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
Installation inspected by a registered engineer	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
Manufacturer's installation checklists completed (attach a copy of each)	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>

Other method of Certification of Installation (specify):

If as-built layout of UST system has changed from proposed layout, attach as-built site plan.

Enter additional comments here:

Effective 7/1/2008, all new and replaced tanks and piping must be secondarily contained with monthly interstitial monitoring. New or replaced dispenser systems and piping must be provided with water-tight sumps that are monitored monthly for leaks and tested for liquid tightness once every 3 years. New or replaced dispenser system and piping sumps must be liquid-tight, compatible with the substance conveyed, allow for visual inspection/monitoring and be liquid-tightness tested every 3 years.

1.0 INTRODUCTION

This report presents the results of the closure of three underground storage tanks (USTs) located at the former Cantley Bros. Exxon in Racine, Boone County, West Virginia. Closure activities were conducted by Barnett Builders Construction Group (Barnett Builders) of Hillsboro, West Virginia. The closure activities described herein were conducted at the request of the property owner, Mr. Lester Cantley.

1.1 Site location

The site is located on the southeast side of Route 94 in Racine, West Virginia. **Figure 1** depicts the site on a portion of the United States Geological Survey's Racine, West Virginia 7.5-minute topographic quadrangle. The site is the former location of Cantley Bros. Exxon. **Figure 2** is a site diagram of the property, and photographs of the site are included in **Appendix A**.

2.0 UST REMOVAL

On May 16, 2016, Barnett Builders began closure activities to remove three USTs from the subject site. A description of each tank is provided below.

TANK ID	CONSTRUCTION	CAPACITY (gallons)	CONTENTS
T-1	Steel with interior fiberglass coating	6,000	Gasoline
T-2	Steel	6,000	Gasoline
T-3	Steel	4,000	Gasoline

Based on information provided by the West Virginia Department of Environmental Protection (WVDEP), the USTs were installed in November 1985. It is not know when the USTs were last operated. However, based on information from the property owner and the WVDEP, the USTs may have been last operated sometime between 2005 and 2007. **Figure 2** shows the former location of the USTs.

2.1 Removal of Tank Contents

Prior to the removal of the tanks, Barnett Builders removed waste fluid from within each tank. The waste product was contained in a Department of Transportation (DOT)-spec 55-gallon drum, properly labeled, and stored onsite pending final disposition.

2.2 Tank Removal and Disposal

Prior to removal, the interior atmosphere of each tank was monitored using a combustible gas indicator (CGI). Based on CGI readings, only the 4,000-gallon UST designated as T-3 required purging of combustible vapors. After removal of the tanks, a visual inspection of each tank was conducted. Obvious indications of tank failure was not observed in either of the 6,000-gallon USTs. tank. Minor corrosion holes were noted in the UST designated as T-3 (see **Figure 2**). A hole was cut in the end of each tank and the interior of each tank was cleaned onsite. A copy of the UST cleaning certificate is included in **Appendix B**. Additionally, steel product and vent piping associated with the tanks was removed. Product dispensers associated with the USTs were also removed.

The waste material removed from the tanks during cleaning was contained in a DOT-spec 55-gallon drum and properly labeled. This waste, as well as the waste product referenced in Section 2.1 of this report, was transported by Eco-First, Inc. to Capital City Oil, Inc. in Mt. Vernon, Ohio for disposal. A copy of the disposal receipt for this waste is included in **Appendix B**.

The tanks were transported to RJ Recycling in Nitro, West Virginia for salvage. Copies of the UST disposal receipts, the final Notification of Underground Storage Tanks Closure form, and the UST-22 Tank Closure Report form are included in **Appendix B**.

2.3 Soil and Groundwater Conditions

During excavation activities to remove the USTs, the soil within the UST pit exhibited aromatic and visual indications of petroleum hydrocarbon contamination. The soil within the UST pit consisted primarily of brown to gray sand with sandstone cobbles at a depth of 12 feet below grade. Groundwater was not encountered in the UST pit.

On May 16, 2016, Barnett Builders contacted the WVDEP, Office of Environmental Remediation (OER) via electronic correspondence regarding site conditions, and visual and

aromatic indications of petroleum hydrocarbons in soil. Based on the above, the WVDEP issued Leak Identification # 16-014 for the site.

2.4 Confirmatory Soil Sampling

At the conclusion of the activities to remove the tanks, Barnett Builders collected soil samples to evaluate soil quality within the UST pit and beneath the former location of each of the product dispensers for the USTs. Soil samples were collected in accordance with the WVDEP UST closure requirements. Soil samples were collected from beneath the former location of each tank and from each of the walls of the UST pit. The location of each soil sample collected from the site is depicted on **Figure 2**. One soil sample was also collected beneath each of the former product dispensers designated as D-1 thru D-6.

Barnett Builders would like to note that during collection of the soil sample from beneath the former location of D-3, a steel UST was encountered at an approximate depth of four feet below grade (see **Figure 2**). It is estimated that this UST is 1,000-gallons in volume. The UST was not removed due to proximity to a support post for the station canopy. Additionally, it is not certain as to ownership of the UST. The property owner, Mr. Lester Cantley, indicated that he was not aware of the existence of the UST.

A total of 13 soil samples were placed in laboratory-provided sample containers, marked with identification, and sent by chain-of-custody in an insulated cooler with ice to REI Consultants, Inc. (REIC) of Beaver, West Virginia. The soil samples were analyzed for total petroleum hydrocarbon (TPH) diesel and gasoline range organics (DRO/GRO) by United States Environmental Protection Agency (USEPA) Method 8015C and for benzene, toluene, ethylbenzene, and total xylenes (BTEX) and methyl tertiary butyl ether (MTBE) by USEPA Method 8021B.

3.0 ANALYTICAL RESULTS

Analytical results for the confirmation soil samples obtained during the UST closure activities are summarized in the attached **Table 1**. Concentrations of TPH-DRO, GRO, BTEX, and MTBE were below the laboratory practical quantitation limit (PQL) and the soil action levels pursuant to the *West Virginia Guidance Document for Leaking Underground Storage Tank (LUST) Site Assessments and Corrective Actions* for each sample collected with the exception of the following:

- TPH-DRO in excess of the soil action level of 100 milligrams per kilogram (mg/kg) pursuant to the *Guidance Document* was detected in three samples at concentrations ranging from 112 mg/kg in the sample collected from beneath the former location of dispenser #3 (D-3) to 307 mg/kg in the sample collected from beneath the former location of dispenser #2 (D-2).
- TPH-GRO in excess of the soil action level of 100 mg/kg pursuant to the *Guidance Document* was detected in five samples at concentrations ranging from 453 mg/kg in the sample collected from beneath T-2 to 2,110 mg/kg in the sample collected from beneath the former location of D-3.
- Benzene in excess of the soil action level of 0.05 mg/kg pursuant to the *Guidance Document* was detected in five samples at concentrations ranging from 0.262 mg/kg in the sample collected from beneath the former location of D-3 to 4.78 mg/kg in the sample collected from beneath the former location of T-3.
- Total BTEX in excess of the soil action level of 10 mg/kg pursuant to the *Guidance Document* was detected in five samples at concentrations ranging from 19.149 mg/kg in the sample collected from beneath T-2 to 178.732 mg/kg in the sample collected from beneath the former location of D-3.
- MTBE in excess of the soil guidance level of 0.04 mg/kg pursuant to the *Guidance Document* was detected in three samples at concentrations ranging from 0.377 mg/kg in the sample collected from beneath T-2 to 2.55 mg/kg in the sample collected from beneath T-1. It should be noted that although the MTBE concentrations in the samples collected from beneath D-2 and D-3 were reported at values below the practical quantitation limit (PQL), the respective PQLs exceed the soil guidance level.

A copy of the laboratory report for each soil sample and chain-of-custody is included in **Appendix C**.

INSTRUCTIONS AND GENERAL INFORMATION

Please type or print in ink. Also, be sure you have signatures in ink for sections VIII and XI. Complete a notification form for each location containing underground storage tanks. If more than 6 tanks are present at this location, photocopy pages 2 through 4 and use them for additional tanks.

The primary purpose of this notification program is to locate and evaluate underground storage tank systems (USTs) that store or have stored petroleum or hazardous substances. The information you provide will be based on reasonably available records, or in the absence of such records, your knowledge and recollection.

State law (West Virginia Underground Storage Tank Act, Chapter 22 Article 17) requires UST owners to use this notification form for all USTs storing regulated substances that are brought into use after May 1, 1990, (May 8, 1986, by Federal law) or USTs in the ground as of May 1, 1990, (May 8, 1986 by Federal law) that stored regulated substances at any time.

Who Must Notify? The UST Act requires owners of USTs that store regulated substances (unless exempted) to notify the WV Department of Environmental Protection of the existence of their USTs. "Owner" is defined as:

- any person who owns an UST that was in use on November 8, 1984 or after used for storage, use or dispensing of regulated substances
- any person who owned the UST immediately before the discontinuation of its use if last used before November 8, 1984.

Also, any facility that has made any changes to facility information or UST system status must submit a notification form.

Where to Notify? Send completed forms to the address above.

What USTs Are Included? An UST system is defined as any one or combination of tanks that (1) Is used to contain an accumulation of regulated substances, and (2) whose volume (including connected underground piping) is 10% or more below the ground. Regulated USTs store petroleum or hazardous substances, (see the following "What Substances Are Covered").

Penalties: Any owner who knowingly fails to register or submits false information shall be subject to a civil penalty not to exceed \$10,000 for each tank that is not registered or for which false information is submitted.

I. OWNERSHIP OF UST(S)

Owner Name (Corporation, Individual, Public Agency, Other Entity)
Lester Cantley Jr.

West Virginia Department of Environmental Protection NOTIFICATION FOR UNDERGROUND STORAGE TANKS

Table with columns for Tank ID # (1, 2, 3) and rows for Overfill device installed (insert type below), Full Shut-Off "Flapper" Valve, Overfill Alarm, Ball Float, and Capacity (4g).

X. CLOSURE OR CHANGE IN SERVICE (be sure that class B individual signs page 4)

Table with columns for Tank ID # (1, 2, 3) and rows for 1. Estimated date UST last used for storing regulated substance, 2. Tank Closure (check all that apply), and 3. Site Assessment.

XI. CERTIFICATION OF INSTALLATION (COMPLETE FOR UST SYSTEMS INSTALLED AFTER 12/22/1988)

Table with columns for Tank ID # (1, 2, 3) and rows for Installer check all that apply: Installer is certified by tank & piping manufacturer, Installer certified by the WVDEP, Installation inspected by a registered engineer, and Manufacturer's installation checklists completed.

If as-built layout of UST system has changed from proposed layout, attach as-built site plan. Enter additional comments here:

Effective 7/1/2008, all new and replaced tanks and piping must be secondarily contained with monthly interstitial monitoring. New or replaced dispenser systems and piping must be provided with water-tight sumps that are monitored monthly for leaks and tested for liquid tightness once every 3 years.

RE: CANTLEY BROS EXXON

Work Order #: 16052474

Dear MR. BILL BARNETT:

REI Consultants, Inc. received 14 sample(s) on 5/20/2016 for the analyses presented in the following report.

Sincerely,

Beth Johnson
Project Manager

Client: BARNETT BUILDERS
Project: CANTLEY BROS EXXON

The analytical results presented in this report were produced using documented laboratory SOPs that incorporate appropriate quality control procedures as described in the applicable methods. Verification of required sample preservation (as required) is recorded on associated laboratory logs. Any deviation from compliance or method modification is identified within the body of this report by a qualifier footnote which is defined at the bottom of this page.

All sample results for solid samples are reported on an "as-received" wet weight basis unless otherwise noted.

Results reported for sums of individual parameters, such as TTHM and HAA5, may vary slightly from the sum of the individual parameter results, due to rounding of individual results, as required by EPA.

The test results in this report meet all NELAP and/or VELAP requirements for parameters clearly designated as PA, VA, PA/VA, or VELAP in the column labeled NELAP.

Please note if the sample collection time is not provided on the Chain of Custody, the default recording will be 0:00:00. This may cause some tests to be apparently analyzed out of hold.

All tests performed by REIC Service Centers are designated by an annotation on the test code. All other tests were performed by REIC's Main Laboratory in Beaver, WV.

This report may not be reproduced, except in full, without the written approval of REIC.

DEFINITIONS:

MCL: Maximum Contaminant Level

MDL: Method Detection Limit; The lowest concentration of analyte that can be detected by the method in the applicable matrix.

Mg/Kg or mg/L: Units of part per million (PPM) - milligram per Kilogram (weight/weight) or milligram per Liter (weight/volume).

NA: Not Applicable

ND: Not Detected at the PQL or MDL

PQL: Practical Quantitation Limit; The lowest verified limit to which data is quantified without qualifications. Analyte concentrations below PQL are reported either as ND or as a number with a "J" qualifier.

Qual: Qualifier that applies to the analyte reported.

TIC: Tentatively Identified Compound, Estimated Concentration denoted by "J" qualifier.

Ug/Kg or ug/L: Units of part per billion (PPB) - microgram per kilogram (weight/weight) or microgram per liter (weight/volume).

QUALIFIERS:

X: Reported value exceeds required MCL

B: Analyte detected in the associated Method Blank at a concentration > 1/2 the PQL

E: The sample result is within the method accepted Linear Dynamic Range determined by the lab for this analysis. However, it may be considered estimated when applying the TNI (The NELAC Institute) standard.

H: Holding time for preparation or analysis has been exceeded.

J: Analyte concentration is reported, and is less than the PQL and greater than or equal to the MDL. The result reported is an estimate.

S: % REC (% recovery) exceeds control limits

Sotero,

I have found another site where the closure report has not been submitted by the RP. I've searched all of our files and cannot find it. I have also attempted to contact the RP with no response. When you get a chance can you check your files for the parts on this one. Thanks in advance for your help.

Review of Confirmed Release

Incomplete: See the required actions below.

Additional Comments

Based on the Closure Report, contamination is present below tanks 1,2&3 and dispensers 2&3. Because the side walls in the tank pit are below action levels and groundwater was not encountered a Site Characterization Report is not required and the site should go straight to corrective action.

Sent via Certified Mail: 9489009000276201338160

Reports Due

The tank owner/operator must submit the following reports to WVDEP within the specified timeframe. Documents are to be submitted using FILE NAME FORMAT of Leak#_ReportName_YYYY.MM.DD:

Report	Due Date	Received Date
280.66 Corrective Action Plan	9/15/2020	

Report Submittals

All Reports/correspondence must reference the Leak ID and WV ID and be mailed and e-mailed to the following locations:

RE: Notice of Violations (NOVs)
Facility ID: 0300297
Case #: Leak ID: 16-014

Dear CANTLEY, LESTER JR,

Enclosed you will find NOV(s) for the above referenced facility and Leak ID. These documents are being issued because of failure to comply with provisions of the Code of Federal Regulations, WV Legislative Rules, and/or Chapter 22, Article 17 of the WV Code.

Failure to take corrective action to eliminate deficiencies may result in enforcement action as outlined in Chapter 22, Article 17 of the West Virginia Code.

Please respond by the requested dates on the enclosed documents. If you have any questions I can be reached at 304-574-4471 or by email at Andrew.R.Stout@wv.gov.

Sincerely,

A handwritten signature in blue ink, appearing to read 'A.R. Stout'.

NOTICE OF VIOLATION

WVDEP/Division of Water and Waste Management
Office of Environmental Enforcement
Tanks Corrective Action Unit

601 57th Street SE
Charleston, WV 25304
304-926-0470

Leak ID: 16-014

Table with 4 main sections: Facility (0300297), Owner (at time of leak), Responsible Party, and Operator (at time of leak). Each section contains fields for Name, Address, Contact, Phone, and Email.

Information received from an inspection conducted on or about on the above facility has revealed that the owner and/or operator of the underground storage tank (UST) system(s) is in violation of the provisions of Chapter 22, Article 17, Section 6 of the Code of West Virginia and/or Section(s):

Violation(s)

Regulation(s): §280.72(b)

NOV#: 2021-00273

Violation Description:

40CFR 280.72(b) of the Rules and Regulations in that the owner/operator failed to begin corrective action in accordance with subpart F after discovery of contaminated soil, contaminated ground water, or free product

Required Corrective Action:

Comply with above cited regulation(s).

Written response due by: 3/19/2021

Sent via Certified Mail: 9489009000276201447886

Therefore, pursuant to the authority in Chapter 22, Article 17 of the Code of West Virginia, the owner/ operator is hereby notified that the owner/operator is in VIOLATION of the provision of the Code of West Virginia as described above. In order to correct these violations, it is necessary to follow the required corrective actions for each violation.

Table with 2 columns: Issuer Contact Information and Name, Address, Email, Phone, Fax.

The issuance of this Notice may result in further enforcement action(s) in accordance with West Virginia Code 22-17. By 3/19/2021, submit your written response including actions taken to correct violations to the Inspector/Project Manager at the address listed above. Please contact the inspector if you have any questions regarding this notice.

Information received from an inspection conducted on or about on the above facility has revealed that the owner and/or operator of the underground storage tank (UST) system(s) is in violation of the provisions of Chapter 22, Article 17, Section 6 of the Code of West Virginia and/or Section(s):

Violation(s)

Regulation(s): §280.66(a)

NOV#: 2023-00626

Violation Description:

40CFR 280.66(a) of the Rules and Regulations in that the owner/operator failed to submit additional information requested by the Agency, or failed to submit a required corrective action plan according to a schedule and format established by the implementing agency and or failure to modify the plan as necessary.

Required Corrective Action:

Comply with above cited regulation(s).

Written response due by: 6/16/2023 **Inspector Comment:** Failed to submit a Corrective Action Plan.

Therefore, pursuant to the authority in Chapter 22, Article 17 of the Code of West Virginia, the owner/ operator is hereby notified that the owner/operator is in VIOLATION of the provision of the Code of West Virginia as described above. In order to correct these violations, it is necessary to follow the required corrective actions for each violation.

INSPECTOR COMMENTS

Onsite to hand deliver Review of Confirmed Release (RCR) to Lester Cantley's residence at 3169 Short Creek Rd. Racine, WV 25165. Kevin Saunders was also onsite to document the delivery and to serve as witness. The RCR was requesting an Initial Site Characterization. Mr. Cantley was not home, so the RCR and UST closure report were left on a chair of his covered porch by the door.

To: Kevin W Saunders <kevin.w.saunders@wv.gov>

Hello,
Mr Saunders, may I have your assistance please?
Would you happen to have any information as to who may have left a review of release on the porch of the caller? Signature could not be made out. Question contact -0470
He had UST's removed about 5 or 6 yrs. ago. I thought it may pertain to that.

Thank you.

Thanks for filling out [DWWM/EE Phone Calls](#)

Comments

I returned a phone call to Mr. Cantley about the RCR at 10:00 am. I explained to him that a Site Investigation needed to be completed to delineate the horizontal and vertical extent of contamination. He said that he can't pay for the work since he lost his social security, and is working part time and might loose his house. He said that he has a backhoe and could dig it up. I said that that was possible, but it would be best to hire a consultant to help with the sampling and screening of the soil. He also stated that the address on file is active by it's hard to get certified mail due to the post office only be open from 7:30-11:30.

RE: Notice of Violations (NOVs)
Facility ID: 0300297
Case #: Leak ID: 16-014

Dear CANTLEY, LESTER JR,

Enclosed you will find NOV(s) for the above referenced facility and Leak ID. These documents are being issued because of failure to comply with provisions of the Code of Federal Regulations, WV Legislative Rules, and/or Chapter 22, Article 17 of the WV Code.

Failure to take corrective action to eliminate deficiencies may result in enforcement action as outlined in Chapter 22, Article 17 of the West Virginia Code.

Please respond by the requested dates on the enclosed documents. If you have any questions I can be reached at 304-574-4471 or by email at Andrew.R.Stout@wv.gov.

Sincerely,

A handwritten signature in blue ink, appearing to read 'Andrew Stout'.

Information received from an inspection conducted on or about **9/14/2023** on the above facility has revealed that the owner and/or operator of the underground storage tank (UST) system(s) is in violation of the provisions of Chapter 22, Article 17, Section 6 of the Code of West Virginia and/or Section(s):

Violation(s)

Regulation(s): §280.65(a)

NOV#: 2023-01580

Violation Description:

40CFR 280.65(a) of the Rules and Regulations in that the owner/operator failed to appropriately conduct investigations of the release, the site and the surrounding area possibly affected by the release as per requirements of 280.65 (a)(1) through 280.65 (a)(4).

Required Corrective Action:

Comply with above cited regulation(s).

Written response due by: 12/31/2023

Regulation(s): §280.65(b)

NOV#: 2023-01581

Violation Description:

40CFR 280.65(b) of the Rules and Regulations in that the owner/operator failed to submit the information collected under 280.65(a) in accordance with the schedule provided by the Agency or as soon as practicable if a schedule has not been provided.

Required Corrective Action:

Comply with above cited regulation(s).

Written response due by: 12/31/2023

Therefore, pursuant to the authority in Chapter 22, Article 17 of the Code of West Virginia, the owner/ operator is hereby notified that the owner/operator is in VIOLATION of the provision of the Code of West Virginia as described above. In order to correct these violations, it is necessary to follow the required corrective actions for each violation.

**ORDER
ISSUED UNDER THE
UNDERGROUND STORAGE TANK ACT
WEST VIRGINIA CODE, CHAPTER 22, ARTICLE 17**

TO: Cantley Bros Exxon and/or Lester E. Cantley Jr.
P.O. Box 62
Racine, WV 25165

DATE: June 28, 2024

ORDER NO.: UST-24-024

INTRODUCTION

The following findings are made, and Order issued to Cantley Bros Exxon and/or Lester E. Cantley Jr. (hereinafter "Mr. Cantley") pursuant to the authority vested in the Director of the Division of Water and Waste Management under Chapter 22, Article 17, Section 1 et seq. of the Code of West Virginia.

FINDINGS OF FACT

In support of this Order, the Director hereby finds the following:

1. Mr. Cantley was the owner/operator of three (3) underground storage tanks (USTs) located at Cantley Bros Exxon in Racine, Boone County, West Virginia. The facility operated under WV Identification No. 0300297.
 - a. A UST registration form dated May 23, 2005, identifies the tank owner as Cantley Bros Exxon. The registration form indicates that Lester Cantley Jr is a manager and partner in the business. The registration form is signed by Lester Cantley Jr.
 - b. A UST registration form dated July 13, 2016, submitted for the closure of the three (3) USTs identifies the tank owner and operator as Lester Cantley Jr. The registration form is signed by Lester Cantley Jr.
 - c. On May 29, 2024, the West Virginia Secretary of State Online Data Services Business and Licensing site shows that Cantley Bros Exxon is still registered to do business in West Virginia.

2. The West Virginia Department of Environmental Protection (WVDEP) issued Unilateral Order No. UST-13-034, on June 11, 2013, to Mr. Cantley requiring closure of substandard USTs. The order became effective on June 13, 2013. The order for compliance required Mr. Cantley to submit a Plan of Corrective Action (POCA). The POCA was required to include provisions for the permanent closure of the USTs at the site in accordance with 40 CFR Subpart G. Subpart G requires the tank owner and/or operator to perform corrective action in accordance with Subpart F if contamination is found during closure of a UST system.
 - a. Mr. Cantley submitted a POCA dated January 30, 2016.
 - b. WVDEP denied the POCA in a letter dated April 5, 2016, because the POCA did not meet the requirements for the action items and schedule for completion dates required in the order for compliance. Mr. Cantley was required to submit a revised POCA. Mr. Cantley failed to submit a revised POCA.
 - c. Mr. Cantley has failed to comply with UST Order UST-13-034.
3. On May 16, 2016, the WVDEP was notified of a release from the UST system that was observed during closure activities. The incident report documents that gasoline odors and elevated photoionization detector (PID) readings were noted during tank closure which is indicative of petroleum contamination from the UST system. As a result, the facility was issued Leak ID No. 16-014.
4. On May 19, 2016, the WVDEP issued a Confirmed Release Notice to Comply (CRNC), which required the investigation of the release at the site. The UST Closure Report was required to be submitted by June 18, 2016. An Initial Site Characterization Report (ISC) was required to be submitted by July 3, 2016. Mr. Cantley failed to submit the reports and failed to perform corrective action in accordance with 40 CFR Subpart F.
5. On or around November 4, 2019, the WVDEP personnel conducted a file review for the facility. During the review it was determined that the UST Closure Report was never submitted and WVDEP issued a Review of Confirmed Release (RCR) requiring the UST Closure Report be submitted by December 6, 2019. Mr. Cantley failed to submit the report.
6. On April 16, 2020, at the request from the WVDEP, a copy of the UST Closure Report was received from the consultant that performed the closure. Review of the document showed multiple soil samples had exceedances for benzene, ethylbenzene, and xylenes, above soil action levels.
7. On March 4, 2021, WVDEP personnel conducted a file review of the facility file. During the review, the following violation of the Code of Federal Regulations and WV Legislative Rules was observed and documented:
 - a. 40 CFR 280.72(b) – Mr. Cantley failed to begin corrective action in accordance with Subpart F after discovery of contaminated soil, contaminated groundwater, or free product.

As a result of this violation, Notice of Violation (NOV) No. 2021-00273 was issued. A response to the NOV was required by March 19, 2021. Mr. Cantley failed to respond to the NOV.

8. On May 16, 2023, WVDEP personnel conducted a file review of the facility file. During the review, the following violation of the Code of Federal Regulations and WV Legislative Rules was observed and documented:
 - a. 40 CFR 280.66(a) – Mr. Cantley failed to submit additional information requested by the Agency or failed to submit a required corrective action plan according to a schedule and format established by the implementing agency and or failure to modify the plan as necessary.

As a result of this violation, Notice of Violation (NOV) No. 2023-00626 was issued. A response to the NOV was required by June 16, 2023. Mr. Cantley failed to respond to the NOV.

9. On September 11, 2023, the WVDEP issued an RCR requiring a Site Investigation Report (SIR) to be submitted by October 26, 2023. Mr. Cantley failed to submit the report.
10. On September 14, 2023, the WVDEP performed an Onsite Inspection and hand delivered the RCR that was issued on September 11, 2023.
11. On October 25, 2023, the WVDEP received a phone call from Mr. Cantley regarding the RCR that was hand delivered to his residence. The call was returned by WVDEP personnel who explained that there is still contamination at the site. A site investigation would need to be conducted to determine the extent of the contamination and then corrective actions would need to take place to remediate the site.
12. On December 1, 2023, WVDEP personnel conducted a file review of the facility file. During the review, the following violations of the Code of Federal Regulations and WV Legislative Rules were observed and documented:
 - a. 40 CFR 280.65(a) – Mr. Cantley failed to appropriately conduct investigations of the release, the site and the surrounding area possibly affected by the release as per requirements of 280.65(a)(1) through 280.65(a)(4).
 - b. 40 CFR 280.65(b) – Mr. Cantley failed to submit the information collected under 280.65(a) in accordance with the schedule provided by the Agency or as soon as practicable if a schedule has not been provided.

As a result of these violations, Notice of Violation (NOV) Nos. 2023-01580 and 2023-01581 were issued. A response to the NOV was required by December 31, 2023. Mr. Cantley failed to respond to the NOVs.

13. On January 18, 2024, WVDEP personnel conducted a file review of the facility file. During the review, the following violations of the Code of Federal Regulations and WV Legislative Rules were observed and documented:

- a. 40 CFR 280.65(a) – Mr. Cantley failed to appropriately conduct investigations of the release, the site and the surrounding area possibly affected by the release as per requirements of 280.65(a)(1) through 280.65(a)(4).
- b. 40 CFR 280.65(b) – Mr. Cantley failed to submit the information collected under 280.65(a) in accordance with the schedule provided by the Agency or as soon as practicable if a schedule has not been provided.

As a result of these violations, Inspection of Violation (IOV) Nos. 2023-01580 and 2023-01581 were issued. Mr. Cantley failed to respond to the IOVs.

14. On or about May 12, 2024, WVDEP personnel conducted a file review of the facility file and determined that Mr. Cantley has failed to respond to the previous NOV's and IOV's issued for Leak ID No. 16-014.

ORDER FOR COMPLIANCE

And now, this day of June 28, 2024, Mr. Cantley is hereby ORDERED by the Director as follows:

1. Mr. Cantley shall immediately take measures to initiate compliance with all pertinent laws and rules.
2. Within thirty (30) days of the effective date of this Order, Mr. Cantley shall submit for approval a proposed plan of corrective action and schedule to include, but not limited to, a plan for delineating the extent of soil and groundwater contamination at the site (Site Investigation Report) including installation of sufficient groundwater wells to determine groundwater flow, and associated reports, outlining action items and completion dates for how and when Mr. Cantley will achieve compliance with all pertinent laws and rules. The plan of corrective action shall make reference to WV Identification No. 0300297, Lead ID No. 16-014, and Order No. UST-24-024. The plan of corrective action shall be submitted to:

**Chief Inspector
Environmental Enforcement - Mail Code #031328
WVDEP
601 57th Street SE
Charleston, WV 25304**

Upon approval, the plan of corrective action and schedule shall be incorporated into and become part of this Order, as if fully set forth herein. Failure to submit an approvable plan of corrective action and schedule or failure to adhere to the approved schedule is a violation of this Order.

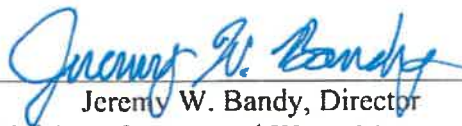

OTHER PROVISIONS

1. Compliance with the terms and conditions of this Order shall not in any way be construed as relieving Mr. Cantley of the obligation to comply with any applicable law, permit, other order, or any other requirement otherwise applicable. Violations of the terms and conditions of this Order may subject Mr. Cantley to additional enforcement action in accordance with the applicable law.
2. The provisions of this Order are severable and should a court or board of competent jurisdiction declare any provisions to be invalid or unenforceable, all other provisions shall remain in full force and effect.
3. This Order is binding on Mr. Cantley, its successors, and assigns.
4. This Order shall terminate upon Mr. Cantley's notification of full compliance with the "Order for Compliance" and verification of this notification by WVDEP.

RIGHT OF APPEAL

Notice is hereby given of your right to appeal the terms and conditions of this Order which you are aggrieved to the Environmental Quality Board by filing a NOTICE of APPEAL on the form prescribed by such Board, in accordance with the provisions of Chapter 22, Article 17, Section 18 of the Code of West Virginia within thirty (30) days after receipt of this Order.

This Order shall become effective upon receipt.

INTRODUCTION

The following findings are made, and Order issued to Cantley Bros Exxon and/or Lester E. Cantley Jr. (hereinafter "Mr. Cantley") pursuant to the authority vested in the Director of the Division of Water and Waste Management under Chapter 22, Article 17, Section 1 et seq. of the Code of West Virginia.

FINDINGS OF FACT

In support of this Order, the Director hereby finds the following:

1. Mr. Cantley was the owner/operator of three (3) underground storage tanks (USTs) located at Cantley Bros Exxon in Racine, Boone County, West Virginia. The facility operated under WV Identification No. 0300297.
 - a. A UST registration form dated May 23, 2005, identifies the tank owner as Cantley Bros Exxon. The registration form indicates that Lester Cantley Jr is a manager and partner in the business. The registration form is signed by Lester Cantley Jr.
 - b. A UST registration form dated July 13, 2016, submitted for the closure of the three (3) USTs identifies the tank owner and operator as Lester Cantley Jr. The registration form is signed by Lester Cantley Jr.
 - c. On May 29, 2024, the West Virginia Secretary of State Online Data Services Business and Licensing site shows that Cantley Bros Exxon is still registered to do business in West Virginia.

Promoting a healthy environment.

2. The West Virginia Department of Environmental Protection (WVDEP) issued Unilateral Order No. UST-13-034, on June 11, 2013, to Mr. Cantley requiring closure of substandard USTs. The order became effective on June 13, 2013. The order for compliance required Mr. Cantley to submit a Plan of Corrective Action (POCA). The POCA was required to include provisions for the permanent closure of the USTs at the site in accordance with 40 CFR Subpart G. Subpart G requires the tank owner and/or operator to perform corrective action in accordance with Subpart F if contamination is found during closure of a UST system.
 - a. Mr. Cantley submitted a POCA dated January 30, 2016.
 - b. WVDEP denied the POCA in a letter dated April 5, 2016, because the POCA did not meet the requirements for the action items and schedule for completion dates required in the order for compliance. Mr. Cantley was required to submit a revised POCA. Mr. Cantley failed to submit a revised POCA.
 - c. Mr. Cantley has failed to comply with UST Order UST-13-034.
3. On May 16, 2016, the WVDEP was notified of a release from the UST system that was observed during closure activities. The incident report documents that gasoline odors and elevated photoionization detector (PID) readings were noted during tank closure which is indicative of petroleum contamination from the UST system. As a result, the facility was issued Leak ID No. 16-014.
4. On May 19, 2016, the WVDEP issued a Confirmed Release Notice to Comply (CRNC), which required the investigation of the release at the site. The UST Closure Report was required to be submitted by June 18, 2016. An Initial Site Characterization Report (ISC) was required to be submitted by July 3, 2016. Mr. Cantley failed to submit the reports and failed to perform corrective action in accordance with 40 CFR Subpart F.
5. On or around November 4, 2019, the WVDEP personnel conducted a file review for the facility. During the review it was determined that the UST Closure Report was never submitted and WVDEP issued a Review of Confirmed Release (RCR) requiring the UST Closure Report be submitted by December 6, 2019. Mr. Cantley failed to submit the report.
6. On April 16, 2020, at the request from the WVDEP, a copy of the UST Closure Report was received from the consultant that performed the closure. Review of the document showed multiple soil samples had exceedances for benzene, ethylbenzene, and xylenes, above soil action levels.
7. On March 4, 2021, WVDEP personnel conducted a file review of the facility file. During the review, the following violation of the Code of Federal Regulations and WV Legislative Rules was observed and documented:
 - a. 40 CFR 280.72(b) – Mr. Cantley failed to begin corrective action in accordance with Subpart F after discovery of contaminated soil, contaminated groundwater, or free product.

As a result of this violation, Notice of Violation (NOV) No. 2021-00273 was issued. A response to the NOV was required by March 19, 2021. Mr. Cantley failed to respond to the NOV.

8. On May 16, 2023, WVDEP personnel conducted a file review of the facility file. During the review, the following violation of the Code of Federal Regulations and WV Legislative Rules was observed and documented:
 - a. 40 CFR 280.66(a) – Mr. Cantley failed to submit additional information requested by the Agency or failed to submit a required corrective action plan according to a schedule and format established by the implementing agency and or failure to modify the plan as necessary.

As a result of this violation, Notice of Violation (NOV) No. 2023-00626 was issued. A response to the NOV was required by June 16, 2023. Mr. Cantley failed to respond to the NOV.

9. On September 11, 2023, the WVDEP issued an RCR requiring a Site Investigation Report (SIR) to be submitted by October 26, 2023. Mr. Cantley failed to submit the report.
10. On September 14, 2023, the WVDEP performed an Onsite Inspection and hand delivered the RCR that was issued on September 11, 2023.
11. On October 25, 2023, the WVDEP received a phone call from Mr. Cantley regarding the RCR that was hand delivered to his residence. The call was returned by WVDEP personnel who explained that there is still contamination at the site. A site investigation would need to be conducted to determine the extent of the contamination and then corrective actions would need to take place to remediate the site.
12. On December 1, 2023, WVDEP personnel conducted a file review of the facility file. During the review, the following violations of the Code of Federal Regulations and WV Legislative Rules were observed and documented:
 - a. 40 CFR 280.65(a) – Mr. Cantley failed to appropriately conduct investigations of the release, the site and the surrounding area possibly affected by the release as per requirements of 280.65(a)(1) through 280.65(a)(4).
 - b. 40 CFR 280.65(b) – Mr. Cantley failed to submit the information collected under 280.65(a) in accordance with the schedule provided by the Agency or as soon as practicable if a schedule has not been provided.

As a result of these violations, Notice of Violation (NOV) Nos. 2023-01580 and 2023-01581 were issued. A response to the NOV was required by December 31, 2023. Mr. Cantley failed to respond to the NOVs.

13. On January 18, 2024, WVDEP personnel conducted a file review of the facility file. During the review, the following violations of the Code of Federal Regulations and WV Legislative Rules were observed and documented:

- a. 40 CFR 280.65(a) – Mr. Cantley failed to appropriately conduct investigations of the release, the site and the surrounding area possibly affected by the release as per requirements of 280.65(a)(1) through 280.65(a)(4).
- b. 40 CFR 280.65(b) – Mr. Cantley failed to submit the information collected under 280.65(a) in accordance with the schedule provided by the Agency or as soon as practicable if a schedule has not been provided.

As a result of these violations, Inspection of Violation (IOV) Nos. 2023-01580 and 2023-01581 were issued. Mr. Cantley failed to respond to the IOVs.

14. On or about May 12, 2024, WVDEP personnel conducted a file review of the facility file and determined that Mr. Cantley has failed to respond to the previous NOV's and IOV's issued for Leak ID No. 16-014.

ORDER FOR COMPLIANCE

And now, this day of June 28, 2024, Mr. Cantley is hereby ORDERED by the Director as follows:

1. Mr. Cantley shall immediately take measures to initiate compliance with all pertinent laws and rules.
2. Within thirty (30) days of the effective date of this Order, Mr. Cantley shall submit for approval a proposed plan of corrective action and schedule to include, but not limited to, a plan for delineating the extent of soil and groundwater contamination at the site (Site Investigation Report) including installation of sufficient groundwater wells to determine groundwater flow, and associated reports, outlining action items and completion dates for how and when Mr. Cantley will achieve compliance with all pertinent laws and rules. The plan of corrective action shall make reference to WV Identification No. 0300297, Lead ID No. 16-014, and Order No. UST-24-024. The plan of corrective action shall be submitted to:

**Chief Inspector
Environmental Enforcement - Mail Code #031328
WVDEP
601 57th Street SE
Charleston, WV 25304**

Upon approval, the plan of corrective action and schedule shall be incorporated into and become part of this Order, as if fully set forth herein. Failure to submit an approvable plan of corrective action and schedule or failure to adhere to the approved schedule is a violation of this Order.

OTHER PROVISIONS

1. Compliance with the terms and conditions of this Order shall not in any way be construed as relieving Mr. Cantley of the obligation to comply with any applicable law, permit, other order, or any other requirement otherwise applicable. Violations of the terms and conditions of this Order may subject Mr. Cantley to additional enforcement action in accordance with the applicable law.
2. The provisions of this Order are severable and should a court or board of competent jurisdiction declare any provisions to be invalid or unenforceable, all other provisions shall remain in full force and effect.
3. This Order is binding on Mr. Cantley, its successors, and assigns.
4. This Order shall terminate upon Mr. Cantley's notification of full compliance with the "Order for Compliance" and verification of this notification by WVDEP.

RIGHT OF APPEAL

Notice is hereby given of your right to appeal the terms and conditions of this Order which you are aggrieved to the Environmental Quality Board by filing a NOTICE of APPEAL on the form prescribed by such Board, in accordance with the provisions of Chapter 22, Article 17, Section 18 of the Code of West Virginia within thirty (30) days after receipt of this Order.

This Order shall become effective upon receipt.

Jeremy W. Bandy, Director

ISSUED UNDER THE
UNDERGROUND STORAGE TANK ACT
WEST VIRGINIA CODE, CHAPTER 22, ARTICLE 17**

TO: Cantley Bros Exxon and/or Lester E. Cantley Jr.
P.O. Box 62
Racine, WV 25165

DATE: June 28, 2024

ORDER NO.: UST-24-024

INTRODUCTION

The following findings are made, and Order issued to Cantley Bros Exxon and/or Lester E. Cantley Jr. (hereinafter "Mr. Cantley") pursuant to the authority vested in the Director of the Division of Water and Waste Management under Chapter 22, Article 17, Section 1 et seq. of the Code of West Virginia.

FINDINGS OF FACT

In support of this Order, the Director hereby finds the following:

1. Mr. Cantley was the owner/operator of three (3) underground storage tanks (USTs) located at Cantley Bros Exxon in Racine, Boone County, West Virginia. The facility operated under WV Identification No. 0300297.
 - a. A UST registration form dated May 23, 2005, identifies the tank owner as Cantley Bros Exxon. The registration form indicates that Lester Cantley Jr is a manager and partner in the business. The registration form is signed by Lester Cantley Jr.
 - b. A UST registration form dated July 13, 2016, submitted for the closure of the three (3) USTs identifies the tank owner and operator as Lester Cantley Jr. The registration form is signed by Lester Cantley Jr.
 - c. On May 29, 2024, the West Virginia Secretary of State Online Data Services Business and Licensing site shows that Cantley Bros Exxon is still registered to do business in West Virginia.

Promoting a healthy environment.

2. **The West Virginia Department of Environmental Protection (WVDEP) issued Unilateral Order No. UST-13-034, on June 11, 2013, to Mr. Cantley requiring closure of substandard USTs. The order became effective on June 13, 2013. The order for compliance required Mr. Cantley to submit a Plan of Corrective Action (POCA). The POCA was required to include provisions for the permanent closure of the USTs at the site in accordance with 40 CFR Subpart G. Subpart G requires the tank owner and/or operator to perform corrective action in accordance with Subpart F if contamination is found during closure of a UST system.**
 - a. **Mr. Cantley submitted a POCA dated January 30, 2016.**
 - b. **WVDEP denied the POCA in a letter dated April 5, 2016, because the POCA did not meet the requirements for the action items and schedule for completion dates required in the order for compliance. Mr. Cantley was required to submit a revised POCA. Mr. Cantley failed to submit a revised POCA.**
 - c. **Mr. Cantley has failed to comply with UST Order UST-13-034.**
3. **On May 16, 2016, the WVDEP was notified of a release from the UST system that was observed during closure activities. The incident report documents that gasoline odors and elevated photoionization detector (PID) readings were noted during tank closure which is indicative of petroleum contamination from the UST system. As a result, the facility was issued Leak ID No. 16-014.**
4. **On May 19, 2016, the WVDEP issued a Confirmed Release Notice to Comply (CRNC), which required the investigation of the release at the site. The UST Closure Report was required to be submitted by June 18, 2016. An Initial Site Characterization Report (ISC) was required to be submitted by July 3, 2016. Mr. Cantley failed to submit the reports and failed to perform corrective action in accordance with 40 CFR Subpart F.**
5. **On or around November 4, 2019, the WVDEP personnel conducted a file review for the facility. During the review it was determined that the UST Closure Report was never submitted and WVDEP issued a Review of Confirmed Release (RCR) requiring the UST Closure Report be submitted by December 6, 2019. Mr. Cantley failed to submit the report.**
6. **On April 16, 2020, at the request from the WVDEP, a copy of the UST Closure Report was received from the consultant that performed the closure. Review of the document showed multiple soil samples had exceedances for benzene, ethylbenzene, and xylenes, above soil action levels.**
7. **On March 4, 2021, WVDEP personnel conducted a file review of the facility file. During the review, the following violation of the Code of Federal Regulations and WV Legislative Rules was observed and documented:**
 - a. **40 CFR 280.72(b) – Mr. Cantley failed to begin corrective action in accordance with Subpart F after discovery of contaminated soil, contaminated groundwater, or free product.**

As a result of this violation, Notice of Violation (NOV) No. 2021-00273 was issued. A response to the NOV was required by March 19, 2021. Mr. Cantley failed to respond to the NOV.

8. On May 16, 2023, WVDEP personnel conducted a file review of the facility file. During the review, the following violation of the Code of Federal Regulations and WV Legislative Rules was observed and documented:

- a. 40 CFR 280.66(a) – Mr. Cantley failed to submit additional information requested by the Agency or failed to submit a required corrective action plan according to a schedule and format established by the implementing agency and or failure to modify the plan as necessary.

As a result of this violation, Notice of Violation (NOV) No. 2023-00626 was issued. A response to the NOV was required by June 16, 2023. Mr. Cantley failed to respond to the NOV.

9. On September 11, 2023, the WVDEP issued an RCR requiring a Site Investigation Report (SIR) to be submitted by October 26, 2023. Mr. Cantley failed to submit the report.
10. On September 14, 2023, the WVDEP performed an Onsite Inspection and hand delivered the RCR that was issued on September 11, 2023.
11. On October 25, 2023, the WVDEP received a phone call from Mr. Cantley regarding the RCR that was hand delivered to his residence. The call was returned by WVDEP personnel who explained that there is still contamination at the site. A site investigation would need to be conducted to determine the extent of the contamination and then corrective actions would need to take place to remediate the site.
12. On December 1, 2023, WVDEP personnel conducted a file review of the facility file. During the review, the following violations of the Code of Federal Regulations and WV Legislative Rules were observed and documented:

- a. 40 CFR 280.65(a) – Mr. Cantley failed to appropriately conduct investigations of the release, the site and the surrounding area possibly affected by the release as per requirements of 280.65(a)(1) through 280.65(a)(4).
- b. 40 CFR 280.65(b) – Mr. Cantley failed to submit the information collected under 280.65(a) in accordance with the schedule provided by the Agency or as soon as practicable if a schedule has not been provided.

As a result of these violations, Notice of Violation (NOV) Nos. 2023-01580 and 2023-01581 were issued. A response to the NOV was required by December 31, 2023. Mr. Cantley failed to respond to the NOV's.

13. On January 18, 2024, WVDEP personnel conducted a file review of the facility file. During the review, the following violations of the Code of Federal Regulations and WV Legislative Rules were observed and documented:

- a. 40 CFR 280.65(a) – Mr. Cantley failed to appropriately conduct investigations of the release, the site and the surrounding area possibly affected by the release as per requirements of 280.65(a)(1) through 280.65(a)(4).
- b. 40 CFR 280.65(b) – Mr. Cantley failed to submit the information collected under 280.65(a) in accordance with the schedule provided by the Agency or as soon as practicable if a schedule has not been provided.

As a result of these violations, Inspection of Violation (IOV) Nos. 2023-01580 and 2023-01581 were issued. Mr. Cantley failed to respond to the IOVs.

14. On or about May 12, 2024, WVDEP personnel conducted a file review of the facility file and determined that Mr. Cantley has failed to respond to the previous NOV's and IOV's issued for Leak ID No. 16-014.

ORDER FOR COMPLIANCE

And now, this day of June 28, 2024, Mr. Cantley is hereby ORDERED by the Director as follows:

1. Mr. Cantley shall immediately take measures to initiate compliance with all pertinent laws and rules.
2. Within thirty (30) days of the effective date of this Order, Mr. Cantley shall submit for approval a proposed plan of corrective action and schedule to include, but not limited to, a plan for delineating the extent of soil and groundwater contamination at the site (Site Investigation Report) including installation of sufficient groundwater wells to determine groundwater flow, and associated reports, outlining action items and completion dates for how and when Mr. Cantley will achieve compliance with all pertinent laws and rules. The plan of corrective action shall make reference to WV Identification No. 0300297, Lead ID No. 16-014, and Order No. UST-24-024. The plan of corrective action shall be submitted to:

**Chief Inspector
Environmental Enforcement - Mail Code #031328
WVDEP
601 57th Street SE
Charleston, WV 25304**

Upon approval, the plan of corrective action and schedule shall be incorporated into and become part of this Order, as if fully set forth herein. Failure to submit an approvable plan of corrective action and schedule or failure to adhere to the approved schedule is a violation of this Order.

OTHER PROVISIONS

1. Compliance with the terms and conditions of this Order shall not in any way be construed as relieving Mr. Cantley of the obligation to comply with any applicable law, permit, other order, or any other requirement otherwise applicable. Violations of the terms and conditions of this Order may subject Mr. Cantley to additional enforcement action in accordance with the applicable law.
2. The provisions of this Order are severable and should a court or board of competent jurisdiction declare any provisions to be invalid or unenforceable, all other provisions shall remain in full force and effect.
3. This Order is binding on Mr. Cantley, its successors, and assigns.
4. This Order shall terminate upon Mr. Cantley's notification of full compliance with the "Order for Compliance" and verification of this notification by WVDEP.

RIGHT OF APPEAL

Notice is hereby given of your right to appeal the terms and conditions of this Order which you are aggrieved to the Environmental Quality Board by filing a NOTICE of APPEAL on the form prescribed by such Board, in accordance with the provisions of Chapter 22, Article 17, Section 18 of the Code of West Virginia within thirty (30) days after receipt of this Order.

This Order shall become effective upon receipt.

I have scheduled to hand deliver the order to Mr. Cantley next Thursday the 26th.

On Thu, Sep 19, 2024 at 11:04 AM Stout, Andrew R <andrew.r.stout@wv.gov> wrote:

I have called him, but could not leave a message since he does not have the mailbox set up on his phone. I sent a text stating that I needed to deliver some paperwork that he would need to sign for. I have not heard back from him yet. I will try weekly until I can get it delivered then will send the hand delivery slip to everyone.

Thank you,

I don't think so, because he has been in the field.

Yes, we will get someone to hand deliver. Is there a form that we need to have completed to show hand delivery?
Thank you.

Time delivered Lester E 10:36 am

I Am writing to say I do not have
the Money to get the ground dug up
on this site. I had to Borrow
the Money before. I can't get a loan
to have the work done. I'm on a fixed income.
I want to Appeal

Lester Cantley for Cantley Exxon
Im writing to say this should have
been taking care of in 2016 when the
tanks were took out of the ground
I shouldnt have to get this Done
Again. I had the tanks took out An
new Dirt and sand + Rock put back
in the holes, No one From DEP
told I to not Cover it up Now its
About 7-8 years Later Now DEP
Wants it Dug back up take the Dirt
out An sample it Again. I talk to
Andrew stout DEP (Project MAN)
on the phone in the later part of 2024
An I Ask him how come Im Just
hearing About this he said that it fell
thur the Cracks for 7-8 years
I dont think the tanks was put in
ground in the 80^s WAS Inspected
Charles Hill own the Gas Si then
but that was in the past.
I do not have the Money for this
Work to be done.
